

60 Years' Experience

.... The experience of The Temperance and General Provident Institution of Great Britain, which was organized in 1840 (now nearly sixty years ago), shows a very marked difference between the death rate in its Temperance Section and its General Section. The average annual savings from mortality in its Temperance Section for the last thirty years has been nearly ten times as much as in its General Section.

Other companies making the same classification of risks show a similar record.

The Temperance and General Life Assurance Company is the **TOTAL ABSTAINERS** Company of Canada. Its record for careful selection of risks, investment of funds and economical management is second to none. No company is making more steady, solid and satisfactory gains in strength and magnitude.
