

TABLE A.2.4

CANADA

National Current and Projected NO_x Emissions
(10⁶ tonnes/year)

	<u>Current 1980</u>	<u>Projected 1990</u>	<u>Projected 2000</u>
Electric Utilities	0.25	0.19	0.26
Industrial Fuel Combustion	0.30	0.30	0.33
Residential/Commercial Fuel Combustion	0.09	0.07	0.07
Non-ferrous Smelters	0.01	0.01	0.01
Other Industrial Processes ¹	0.07	0.07	0.07
Transportation	<u>1.11</u>	<u>1.34</u>	<u>1.67</u>
TOTAL	1.83	1.98	2.41

¹ Includes process emissions from petroleum refining, natural gas processing, tar sands operations, other industrial processes and miscellaneous sources.

² Source of Projections: The projected emission estimates are based on the current 1980 emissions and were developed by Environment Canada using energy consumption projections provided in National Energy Board reports.
