When This World is Not

mobile forces of the invisible worlds. One thing more is certain, that the origin of all the forces of the invisible is in personality; for the atom, it is agreed, bears all the marks of being a manufactured article. Different-sized shot could not have greater uniformity of structure and constitution. And their whole behavior shows that they are controlled by an admirable wisdom past finding out.

That these forces exist and are necessarily active there are three proofs. Worlds have been made, not of things and forces that do appear. They were abundantly displayed in the physical miracles of Christ and others; and these forces, independently of the physical miracles at various times, have continuously helped men.

(1) Concerning the first fact—that worlds have been made—nothing need be said except that these forces, being personal, cannot be supposed to be exhausted, and hence creations can go on continuously. We are assured that they do. And the personal element more and more relates itself to personalities. "I go to prepare a place for *you*," to fit up a mansion according to tastes, needs, and enjoyments of the future occupant.
