The great benefit of Life Assurance to all classes of persons, and especially to those beginning the world with small means, is daily becoming of greater importance; and as it becomes better understood, will no doubt be much more generally attended to. A celebrated writer states that, "nothing is more uncertain than the life of a single individual." And it is a sense of this insecurity that first gave rise to Life Assurance Societies; and in answer to objections sometimes urged against their propriety, as implying a want of reliance on Divine Providence, the same writer observes that "provisions made by Life Assurance are generally of so moderate a character as to be in perfect consistency with the spirit of Christianity, strictly comes within the limits of that Divine command of providing for his own household, which, whosoever neglects is worse than an Infidel." It is particularly recommended and adapted to all young married men, and those about entering that honourable estate, both in town and country; and while they are in the enjoyment of health, the continuance of which is as uncertain as life itself. Ninety per cent. of the net profits are divided among the Policy Holders every five years. Applicants will receive every information and attention to their requests, from the Society's Agent at Halifax, who furnishes all the necessary blanks and Medical Examiner. Attendance free of expense. Communications by mail must be post paid.
