
EXTRACTS

FROM THE PRIVATE SEALING LOGS OF PELAGIC SEALERS, SHOWING
DATES AND POSITIONS AT SEA, ON THE JAPAN COAST, AND IN
THE VICINITY OF THE RUSSIAN SEAL ISLANDS, WHEN AND
WHERE FUR SEALS WERE TAKEN.

1893.*

NOTE.—The object of the information being to establish the relative positions from day to day, throughout the season, where seals were taken, and not to show the actual number of skins secured; any slight discrepancy in the number shown to have been taken, as compared with the figures given in the return of the catch at appendix No. 36, can have no significance. Some days, on which single skins were secured in the same positions as the day previous, are not recorded. In other instances where no positions could be taken, skins are omitted.

* John McLeod, master schooner "Pioneer" American side (App. No. 34.)
