FOUR-POINT GAIN BY MAPLE LEAF

Steamships and Brazilian Are Active Features in Broader Market.

Highly encouraging war news was reflected on the Toronto Exchange yesterday, in common with other markets. Trading broadened out to more than 2000 shares, exclusive of mining stocks, with activity centring in Steamships common and Brazilian. The former, after opening at 11%c, advanced to 47%c, closing at the top, a net advance, however, of only %, Dealings in this issue approached 600 shares. Definite strength was displayed by Brazilian, in which the turnover fell little short of that of Steamships. The stock opened ½ up, at 44, and moved up to 45%, closing only ½ below the best, for a net gain of 1%.

The most striking advance, however, was made by Maple Leaf Milling. All the transactions in this issue were on a much smaller scale. Maple Leaf scored a clear gain of four points, closing at 128½, the highest of the day, and a full point above the previous high record. Another firm spot was Dominion Canners, which advanced to 37½, after opening at 35. The steels showed little change, Dominion Iron selling ½ lower, at 62½, and Steel of Canada ½ higher, at 2½.

The war loans were extremely quiet, and showed no decided trend.

The day's transactions: Shares, exclusive of mining stocks, 2053; war loans, \$3800.

Then you would weigh carefully the advantages and disadvantages of an Individual Executor compared with a Corporate Executor. The advantages of the Corporate Executor are many. For instance, a Corporation never dies, has ample financial responsibility, and experts to take charge of every phase of the work, conducting the affairs of the estate as a regular business to the heirs, thus being accessible for interviews and reports at all times. A Corporate Executor's charges are no more, and often less than those of an Individual Executor. Our Booklet, "Making Your Will," mailed on request.
