

THE NIPISSING OF THE NORTH

That is the Name Bestowed Upon the
MOOSE HORN MINES
(MONTREAL RIVER)

By a Cobalt Mining Engineer.

Remember that when you buy stock in the **MOOSE HORN** you are getting an interest in a great property, with numerous veins uncovered showing native silver at the surface. Assays have been had on six distinct veins, running from 250 to 13,000 ounces of silver to the ton. The main shaft is down 68 feet, with a two-inch vein carrying values up in the thousands. The Moose Horn is no gamble—it is a certainty, and **WILL BE ONE OF THE GREATEST MINES OF THE NEW COBALT!**

Enough stock has been underwritten to provide ample working capital for one year. The present offering is made to put in a complete plant, including six-drill compressor, etc. This stock is going fast, both here and in New York, where it is listed on the curb.

Capt. John Harris says, in his report on the Moose Horn: "At about twenty-five (25) feet down the shaft, the vein widens to one inch of Calcite, in some places **SHOWING ALMOST SOLID SILVER.** The vein holds good to the bottom of the shaft and the full length of the drift."

"I have been in the Cobalt Camp almost from its beginning, and would say that there are as good showings of silver on the Moose Horn property as in any of the Cobalt Mines at their commencement, and for the same amount of work having been done."

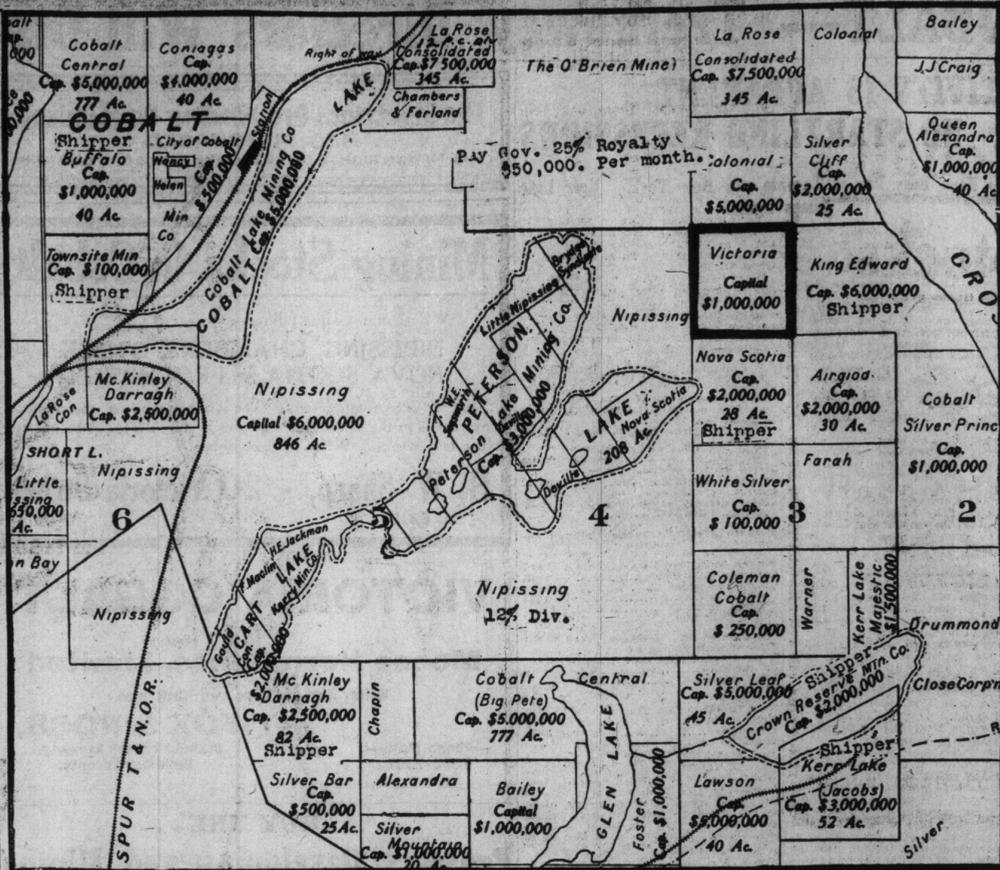

"**I BELIEVE THE MOOSE HORN MINE CAN BE MADE A PAYING PROPERTY FROM THE START.**"

Send your orders to the regular brokers, who are advertising the stock. Full information will be given at **ROOM K (ON THE OFFICE FLOOR), KING EDWARD HOTEL, WHERE SAMPLES OF THE VERY RICH ORE MAY BE SEEN.**

COME AND SEE THEM AND BE CONVINCED BY THE EVIDENCE OF YOUR OWN EYES. Act quickly. The man who procrastinates loses the golden opportunity. **PRICE 50c PER SHARE.**

LOCATION AND RICH VALUES

Make a Great Mine.

THE VICTORIA SILVER COBALT MINE

Has both these advantages. It immediately adjoins the Nipissing, Nova Scotia, Watts, O'Brien and Colonial (see map). The Victoria has a complete plant, and day and night shifts are working on rich veins carrying over 100 ozs. of silver to the ton.

The President is in receipt of a letter from Capt. John Harris, Manager, stating that in his opinion the

VICTORIA CAN SHIP WITHIN 30 DAYS.

The capital of the Victoria is less than half, and in some cases only one-sixth of that of its neighbors, and shipments mean large and continuous dividends to its stockholders.

There is absolutely **no risk** in buying Victoria, the day of chance on this property is past. Act quickly, as the stock is going fast both here and in New York. Send orders through regular brokers or to the undersigned.

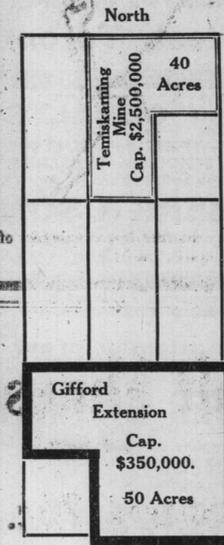

Full Information May Be Obtained and Samples of the Ore Inspected at Room K (on the Office Floor), King Edward Hotel, Toronto, Ont. Price 65c Per Share.

Gifford Extension

A PROPERTY WORTHY OF CONSIDERATION BY INVESTORS

The location of the Gifford Extension makes it one of the best prospects in the Cobalt Camp to-day, and its low capitalization—only \$350,000, of which 200,000 shares have been placed in the treasury—marks it out as one of the most promising of the newer mines in the camp.

This property is right in the Temiskaming section, in which is located the famous Temiskaming Mine, one of the greatest silver mines in the world. It has already shipped over \$1,000,000 worth of silver to the smelters, and paid out a quarter of a million in dividends.

The men connected with the Gifford Extension are well known in Cobalt circles. Their names are a guarantee of fair treatment to the shareholders.

It is safe to say that the Gifford Extension is one of the best non-shippers in the Cobalt Camp.

GIFFORD DEVELOPMENT IS ANXIOUSLY WATCHED

Big Contract Let for 200-Ft. Shaft—Another Vein Found on La Rose.

COBALT, Nov. 12.—(From the Man on the Spot).—Another rich vein was struck at the La Rose property this morning in the McDonald tunnel. It is a rich vein of cobalt and argentine, 4 to 6 inches wide, and carries 10,000 ounces of silver to the ton. This new vein runs parallel to the McDonald vein, and is looked upon as a very valuable discovery. These two veins make up a width of about 9 inches of solid rich

ore that will average over 7,000 ounces of silver to the ton. To-day the La Rose shipped a 40-ton car load of high grade ore to Copper Cliff, and several car loads of second grade ore to Denver. This new La Rose vein, struck at the 90-foot level, immediately south of the office, is narrow, but is producing considerable slab silver. The new main Temiskaming shaft has now reached the 130-foot depth, and to-day a 20-foot cross-cut has connected it with the main workings of the mine at the 100-foot level. While the cross-cut was being driven a 12-inch cobalt-silver vein was cut, but it is not the intention of the management to drift on this vein at present, as the present plant is being taxed to its utmost capacity. This main shaft, however, will be continued down to connect with the 250-foot level, which will be completed in the course of a month. A raise is now being made from this lower level to connect with this shaft. A stope is being carried along with the drift run on No. 2 vein at the 250-foot level. Timbering will be put in preparatory to raising and stopping. Drifting and stoping is also being done on No. 1 vein at the 250-foot level. A drift has been run in for 10 feet on the Temiskaming vein that runs into the Ganz property. This twenty-acre lot has been acquired by the Temiskaming Company, and is known to be very rich. Work will continue on this vein, which runs due north and south. About one and one-half tons of high-grade ore are being mined here per day. A 30-ton car of high-grade ore will be sent out to-morrow. Work has been started on the Gifford cobalt property this week. A contract has been let to sink a 200-foot double compartment shaft to be completed this winter. This is one of the largest contracts ever let in Cobalt for a shaft sinking. This property is being watched with considerable interest on account of its desirable location and the wonderful showing made by its next door neighbor, the great Temiskaming. At the Foster, forty-five men and five

drills are working double shift. Superintendent John Magdonald is doing some good development work at this property, and will doubtless open up some new ore bodies this winter. One drift is now being run out under Glen Lake.

LA ROSE OCTOBER PROFITS.

The LaRose Mining Company of Cobalt have issued a preliminary statement of production and earnings for the month of October. The figures given out are of a nature that places Cobalt in the eyes of the public as an established camp. For October they are:

	Silver	Contents	Net
	Tons	Ozs.	Value.
Shipments	541	199,271	\$ 89,890
On hand Oct. 31	94	102,454	47,450
	635	301,725	\$137,340
Less on hand Sept.			
20	142	106,287	49,930
October production	493	195,438	\$ 87,410
Estimated expense			23,207
Net profit for Oct.			\$ 64,203
		Silver	Contents
		Ozs.	Profit.
Total for June, July,			
August, September,			
and October	1,230,180	248,853	

RAILROAD EXTENSION ASKED

Montreal River Needs and Must Have Rail Facilities. The feeling is growing stronger every day in the Montreal River section that the Charlton branch of the T. & N. O. Railway should be extended to Elk City as soon as the spring opens, said a north country man. The rush of passenger and freight traffic up the river is increasing daily. The Otisse, Mother Lode and Moose Horn are all producing mines, and de-

Prospectus filed at office of Provincial Secretary, Nov. 11, 1908. Incorporated under the Ontario Companies Act.

No silver-mining region yet discovered offers so rich an opportunity as the newly-opened Montreal River country; and not a proposition in that great ore-bearing tract offers quite as much as does the

MARCELL

ON THE 40-acre tract of Marcell Mines, Limited (no personal liability), there are no less than 15 veins already uncovered. One of them—No. 2—is identical with and parallels the rich Lucky-Godfrey main vein, that produced high-grade silver ore eight feet from the surface. The Devlin-Enright Mine, a heavy producer, adjoins the Marcell on the east, as the rich Lucky-Godfrey does on the south. The Marcell is capitalized for only half a million. Small capitalization means big returns. One Hundred and Fifty Thousand Shares of Stock are now offered to the public at 35c (par value \$1.00) to provide working capital to make this a QUICK profit-getter. INVESTIGATE for yourself. This proposition will stand searchlight scrutiny. But HURRY, as this stock offer will be quickly OVER-subscribed. Prospectus free, postpaid on request.
