Supply of Nitric Soda, Necessary for Manufacture of Explosives, May Be Cut Off in the Event of War.

LONDON, May 18.—A new danger hreatens England, according to Sir hreatens England, according to Sir Villiam Ramsay. Speaking at the British Science Guild. he said that Breat Britain's supply of nitric sode, which came from Chili and Peru and was an absolute necessity for the manufacture of explosives, might be cut off if Great Britain was involved in a war. The government out to be war. The government ought to be warned that it was living on the edge

Unless it did the same as the other European countries and made nitrates from the atmosphere, England would be without ammunition a few months after war broke out.

# Mme Navratil

Will Try to Glean Full Details of Disaster From Children at Home.

NEW YORK, May 18.—The passenger list of the inner Oceanic, outward bound for Europe to-day, included the names of Mme. Marcelle Navratil and her two children, Michel and Edmond, the two waifs of the Titanic wreck about whose identity and fate there has been so much sides of the Atlantic.

Mme. Navratil kept herself in se clusion with her children while in New York, she being completely worn out by her experiences of the past few weeks. Practically her only visitors were her cousin, Miss Rosa Bruno of Elkins Park, Pa., and Miss Margaret Hays, into whose care the children were given by an unidentified man

Once they are at home she hopes to obtain from them the details of their tainment of the people, and The Sunexperience from the time they were taken from the home of their aunt Easter Sunday until they were placed in Miss Hays' care on the night of April 14.

# Heaviest Battle

Japanese Warship Kongo Displaces 25,000 Tons and Has Speed of Twenty-eight Knots.

BARROW-IN-FURNESS Eng. May 18.—The new Japanese battle cruiser Kongo was launched here to-day from Vickers' yard in the presence of the Japanese ambassador and many of the enveloped in a white foreign naval attaches as well as spring season of high tides is respons-thousands of the general public. The ible for these unfavorable weather con-Kongo displaces 25,000 tons, and is the heaviest battle cruiser yet built. She is one of four sister ships, the other three of which are being built in Japan. She carries eight 14-inch guns and sixteen 6-inch guns. She is day that it will become again a weekfitted with turbine engines, estimated ly, notwithstanding its party's victory to develop a speed of 28 knots.

Description of "Venezia," Largest in America, Just Completed at Hanlan's Point.

The illustrated section of The Sunday World contains an excellent photo f the design of the front entrance to "Venezia," that has just been com-pleted at the Point, a small army of workmen consisting of surveyors, carpenters, machinists, painters, artists, iron workers and laborers having been at work fo weeks past, rushing to completion the several buildings and equipment, in order to be ready for the 24th, which is the recognized official opening day of the island enter-tainments. Their labors have been rewarded with success, and now the newest, and what is considered, the best amusement device is almost ready to receive and entertain Torontonians by the thousands every day during the

A Sunday World representative, while visiting Hanlan's Point during the week, was at once attracted with the beautiful imposing front of "Venezia," immediately upon leaving the ferry docker and scenting a write-up on something new, a visit to the scene of activities, was in order. Gaining Leaves New York the interior of the main building, a sight really beautiful was presented. In order to fully describe "Venezia," it is necessary to state that it purports to give a true and complete re-presentation of Venice, showing the celebrated canals and many of the famous buildings and places of interest of that world-famous Italian city, "Venezia" at Hanlan's Point built on such a gigantic scale that a very real and true conception is de-picted. There are in all four large buildings comprising the group, the largest being over 300 feet long. A real canal a quarter of a mile long is built inside of these buildings, and upon 4t the visitors will be seated in gondolas and taken thru the streets and past many of the most celebrated scenes of Venice. Everything has been built to harmonize as closely as pos-sible, and the entire plan strikes one at once as being new and novel, as well as both entertaining and instruc-

Heretofore these large undertakings Hays, into whose care the children were given by an unidentified man when the Titanic was sinking.

The mother said before leaving that she did not intend to mention the Titanic disaster to the children nor speak of their father until she had them safely back at her home in Nice.

Once they are at home she hopes to the children of the struction Co., Limited, who have entered the field to cater to the entered.

### SNOW AND FLOODS IN QUEBEC

Cruiser Launched Heavy Rains Causes Trouble-Laurentians Enveloped With Snow

QUEBEC. May 18.—Following a heavy rainfall, which ended only this morning with sunshine, the rise in the Jacques Cartier and Montmorency Rivers, and the mountain lakes, has been extremely high, flooding the banks and inundating the farms located on the low levels.

Snow fell yesterday all along the Laurentian ranges to such an extent that the mountains were last evening ditions.

French Papen Makes Change. QUEBEC, May 18.-La Vigie, a Liberal daily newspaper, announces toa: the polls this week

The 2,151,600 miles of roads and "near roads" in the rural United States are, as has been expressed by one person of unknown nationality, "now on the highway few hundred feet of the summit by an elevator.

# BIG TAILORS FOR THE PEOPLE

It took us quite a long time to break down the public impression that we could not make a good suit of clothes. for fifteen dollars, to measure. We not only have the public

believing it, but we have some of our friends in the tailoring business quoting scripture to prove that we were always right. Truth to tell it is only recently that they have been converted to our way of thinking.

No matter how you look at it, a suit of clothes, made properly to your measure, is only possible by the tailor dealing direct between the mills and the wearer of the suit—by cutting out all intermediate profits. That is the method employed by the SCOTLAND WOOLEN MILLS COMPANY, and we have yet to hear of another company working on the same basis in Canada.

# YOUR CHOICE OF ANY MATERIAL MADE-TO-ORDER SUIT OR OVERCOAT

You have just time to get in an order for the Holiday. By giving it to us at once, we will be able to devote to it the attention required.

Is it not a great source of satisfaction for any man to be able to walk into a tailoring store and have the choice of any material in the house and know that there will be only one charge for a made-to-order Suit or Overcoat? To feel that you can have some special cut or coat, or have cuffs put on the trousers of your Summer Suit and not be taxed anything extra for the service? That is in some way a part secret of the success of the Scotland Woolen Mills Company. The big inducement apart from this is, however, that you are buying cloth direct from the Mills, and having it made to your measure by the best of artist tailors.

The Scotland Woolen Mills Company is undoubtedly the largest success on this continent in the tailoring business. In Toronto alone we turn out an average of three hundred and fifty-five suits each day. These suits are made to individual measure in our two workroom buildings, and a third building is being rushed to completion to handle more promptly the orders coming daily into our shops.
