EVANGELINE BOOTH OWES LIFE TO DOG

Salvation Army Leader, Helpless, is Brought Assistance Just in Time

NEW YORK, March 31.—Commander Evangeline Booth, U. S. leader of the Salvation Army, who has just recovered from a four months' illness,...

Get Giddle, I whispered, referring to my faithful comrade, Major Welsh. I had often told the dog to get Giddle, and she had come to know the name. Instantly she leaped through to the other room and I could hear the major admonishing the dog to keep still lest I be awakened; but the dog caused such a stir that Major Welsh knew something was wrong. She and several others in the household arose and gave me artificial respiration until the doctor came. After examining me the doctor said: "Well, Commander, I think you probably owe your life to the dog this time. If you had been alone another 10 minutes, it would be telling what might have occurred."

CANTATAS SUNG IN TWO CITY CHURCHES

Triumph of the Cross and From Manger to Cross Impressively Sung

A splendidly impressive rendering of the sacred cantata "The Triumph of the Cross" was given in St. Paul's church last night by the combined choirs of St. Paul's and St. James' churches, under the direction of Prof. J. P. Browne, organist and choir leader. The cantata is by Alexander Matthews, a modern American composer, who was born in England. It is very modern in style and presents most dramatically the crucifixion scene, following very faithfully the Bible story. The chorus work in the singing last night was remarkably fine and the soloists gave brilliant interpretations of their numbers. There were 70 voices in the combined choirs and the solo and special selections were sung with fine expression and feeling, reflecting high credit to the director and the talent and training of the singers. The soloists were Mrs. L. Waters, Miss M. Phil and Edward Mahony were baritone soloists. Mrs. P. N. Woodley sang the netti story, Willard Smith, Fred Irvine, Harold Hopkins and Harry Marley. The congregation that assembled for the cantata, which made a new standard of attainment for the combined choirs and reflected much credit on the director and the singers. The cantata is to be repeated in St. James' church on Thursday evening. Light refreshments were served for the members of the choirs in the Sunday school room after the cantata.

WASHINGTON, March 30.—Minneapolis and St. Louis promoters of the upper Mississippi Barge Line have virtually abandoned their plan for making Cairo, Ill., rather than St. Louis, Mo., the southern terminal of the proposed upper river barge line. St. Louis will remain headquarters of the governments barge line. By a high vacuum process, invented by a Swedish engineer, fresh cut lumber is now "seasoned" in a day or less, sufficiently for the carpenter's bench. The ocean's deepest pit is 82,988 feet in depth.

Pavement Artist Seen By Friends After Disappearance—Work Acclaimed

LONDON, March 31.—Charles Sheppard, Brisbane pavement artist, who disappeared after his picture in a Dominion artists' exhibition had been acclaimed as a work of genius, has been seen and spoken to by friends. He has gone back to the pavement disguised by a newly-grown beard, and his friends declare that this conventionalizing Australian is unlikely to return. "I saw Sheppard showing three oil paintings on the pavement in Charing Cross road a few days ago," said a friend of the artist. "His short beard was enough to disguise him. 'When I said, 'Good morning' to Mr. Sheppard he did not speak at first. I persisted, whereupon he said, 'You understand that any conversation is distasteful to me.'"

CATERPILLAR BOATS FOR SHALLOW RIVER

A river towboat, composed of two hulls placed side by side, piston style, and carrying between them a power plant operated by an endless chain with paddles attached, is the queer contraption that is offered to solve the problem of inland river navigation on shallow streams, says "The Quincey" (Ill.) "Whig-Journal". The affair is really a caterpillar tractor boat which crawls through the water on skims along the surface of it. There will be no fouled propellers nor broken paddle wheels caused by interference in low water. That a boat can crawl through the water with considerable power is probably just as sound a mechanical principle as it is for a caterpillar tractor to make its way across any sort of obstacles.
