## SAYS U. S. MUST YET GO TO GENOA

Lady Astor Speaks at Associated Press Dinner.

Tribute Paid to News Gathering Organization and to Melville E. Stone—Declares U. S. Can Show Quickest Way to World Peace.

(Canadian Press.)  
New York, April 26.—Lady Astor told prominent editors and publishers of the United States yesterday at the annual luncheon of the Associated Press that the United States would yet join the conference at Genoa. "I believe America can show the way to peace," she exclaimed fervently amid a gust of applause. Her audience was mostly men, although the boxes in the gallery were filled with women.

Lady Astor digressed considerably from her prepared address, touching upon such topics as Lloyd George, the press and a closer understanding between England and the United States. In discussing the press, she said: "The Associated Press has been, I think, one of the greatest agencies for progress that we have known in our generation. You cannot realize how great that responsibility is."

"I do not want to flatter the press, but I think it is the whole world should know what it owes to Melville E. Stone, principal counselor of the Associated Press and for many years its general manager. His vision created you and when he died, I think he died what an old negro could die in Virginia. I did. When I showed her a photograph of my husband, she said 'I declare to goodness, Miss Nancy, you just outsmarted yourself.' That is what Mr. Melville Stone did. He just out-thought himself. But his vision is going to lead to a better world and a better understanding among all countries."

"Now," she continued, "will you let me speak to you as a Virginian and not as a British member of parliament? It is true we are getting on. Washington is a lot. We can thank God for Washington. But we had better pray about Genoa."

"I wish from the bottom of my heart that America was at Genoa. I want America to be at Genoa because I believe that we in America can show all countries the quickest way to peace after the war. I think that America will go to Europe yet, because I think she will see that she has got to go. We will have to go because the whole of the earth looks to America for a moral lead."

Fort Worth, Texas, April 26.—Rain continued to fall here early today and flood conditions became more menacing, with a continued rapid rise in the overflowed Trinity river. Reas were expressed that the death list, placed so far at approximately twenty, and the property damage, estimated at several million dollars, would be increased today.

Malaga, Spain, April 26.—Twenty persons are known to have lost their lives and thirty were injured in a fire which swept the government buildings last night and was still burning at four o'clock this morning.

## GOOD THINGS COMING TO THE THEATRES OF ST. JOHN

### IMPERIAL IS TO RESUME WITH BANG

Imperial Theatre will not be playing its own picture policy today and Thursday because of the Rotary Club Minstrels. However, on Friday it will resume with a triple bill that challenges all-comers for variety, fun and speed. Wally Reid and Lila Lee will be seen in a moving day comedy entitled "Rent Free", the first of the Imperial's sporting stories will appear in "The Leather Pushers", Round One. Then for dessert Clyde Cook, grotesque comedian, will appear in unquestionably the funniest thing he has ever done, "The Toreador." This makes a nine reel show of the most interesting character.

### FLOWERS AT THE GARDENS TONIGHT

This is the popular Wednesday night at the Gardens. Flowers will be given as usual.

### N. B. HENS' RECORD.

Fredericton, N. B., April 26.—What is said to be a record for the maritime provinces is revealed in the weekly report of the New Brunswick egg-laying contest for the twenty-fifth week ended April 24, by the pen of Barred Rocks entered by W. E. B. Tait of Dorchester, with a total of sixty-four eggs. The birds of Mr. Tait have been averaging sixty eggs during the last five weeks. Six produced the maximum of seven eggs each, three laid six, and one four.

### IN CHINA

Peking, April 26.—Taking the stand that he intends to employ force to unify the country, General Chang Tso-Lin, governor of Manchuria, has sent a telegram to President Hsu Shi-Chang refusing to withdraw his troops in Chi-Li province. Instead of withdrawing he has sent additional forces southward, making almost 100,000 he now has south of the great wall.

In his message to the president, sent from Mukden, he said:—"In view of the fact that the Chinese government is not unified, and that the Chinese people are not united, it is absolutely necessary to unify North and South China without delay. Otherwise China cannot fulfill her obligations towards the powers."

Gen. Wu Pei-Fu, commander of the forces in Central China, continues sending troops to the north. He has sent Chang Tso-Lin designs to take the government at Peking and establish a dictatorship. The trains for Tientsin are delayed, but the foreign legations are watching the railway station. They express the belief that it is not yet sufficiently serious to justify the use of force. Reports from consuls in the interior of China are to the effect that no fighting is taking place.

WONDERFUL "SLOWING-DOWN" LAMP  
A demonstration was given recently in Manchester, England, with a newly invented lamp, which makes machinery running at the highest possible speed appear to run quite slowly so that every movement it makes can be easily seen. The secret of the lamp is that it does not give a continuous light but emits flashes of 1,000,000 of a second duration so that the effect on the eye is a series of photographic impressions. The lamp is operated in connection with a gear box which causes the light to flicker so rapidly. The photograph shows the inventor, A. J. Elverson, watching the movements of a sewing machine by means of his lamp.

### WIRELESS MUSIC AT THE RITZ.

Music by wireless will be heard at the Ritz, Friday evening, April 28, weather conditions permitting. This is possibly the greatest novelty of the year. Radio-receiving stations are but a new thing in the United States, and have scarcely made their appearance in Canada. Thousands who have read about these wonderful devices for picking up from air and reproducing music at distances ranging as high as 3,000 miles are prone to regard them as fairy tales conceived by impractical and imaginative minds, but on Friday night, atmospheric conditions permitting, the citizens and dancing public of St. John will have the opportunity of seeing this marvelous invention turn out music which will be played 1,000 miles away and wafted on winds to the Ritz Dancing Academy.

The Ritz is able to present this extraordinary novelty by courtesy of the Jones Electric Company, who are sole distributors of radio supplies in the city. Come early. We are expecting a crowd. Usual prices. Dancing 9-12.

**IN WALL STREET.**  
New York, April 26.—(10.30).—The tone of the stock market was irregular at the opening of today's session. Issues of the same description showed confusion, gas and losses. The cheap, or domestic oils continued to strengthen on further advances in prices of refined products, but foreign issues, notably Mexican Petroleum, were heavy. Barnsdale A. soon rose 1-1/2 points, Corden making a similar gain. Columbia Gas advanced 1-4 point and Chicago and Eastern Illinois preferred represented the minor rails, gaining one point. U. S. Steel was firm, but kindred shares, as well as equipments, motors and their accessories eased moderately.

## BUSY MORNING AT MEETING OF W. A.

(Continued from page 1)  
China, \$20 to Miss Amy Carmichael's work in the south of India, \$30 each to two children in the Indian Boarding schools; leaving \$170 to be voted on. There were three alternatives for the use of this money, a fund for the Fredericton diocese, Christmas gifts to the North West and overseas, and boots for the children in the Indian boarding schools under the Dorcas plan.

This report was most enthusiastically received and a great deal of interest was shown in its reading.

The president, Mrs. Smith, told of the work of the educational committee in providing for the children of clergymen in far parts of the dominion. The cost of educating the child for one year had now reached a minimum of \$200, she said, and the grant from this diocese had been raised to \$225.

Mrs. John M. Hay read a list of appeals for the money realized by the life memberships fees, an amount of \$475, and gave instructions to the delegates as to the marking of the ballots on this and on the voting for the Little Helpers' money.

At 12 o'clock the noon prayer of the Women's Auxiliary was given by the members.

The minutes reported that on account of the unavoidable absence of Mrs. W. D. Foster, secretary of the opening committee, her report would be postponed until Friday with a copy of minutes.

A short history of the Pickett Memorial Fund, the report of which would not be read on account of the absence of Miss E. C. Croft.

Keen regret was expressed by business men and others who have had occasion to use the steamer Champlain, when it was learned that she had been burned. She was conceded to be one of the best on the river, both as a freighter and for passenger traffic.

## OUR DAILY BREAD AND MILK.

To the Editor of the Times:—  
Sir:—Some years ago our city council took one-half pound off the standard two pound loaf of bread, that had been in use from the beginning of the city until the 31st of March, 1900, when the council passed the following by-law:

Section 1.—"All bread offered for sale in the City of Saint John by the loaf, shall be not less than 1 1/2 lb. weight of one pound and one-half per loaf, twelve hours after being baked."

How many bakers are living up to this law? "Weigh your bread and see!" Bread was selling at twelve cents per two pound loaf at that time, so that this added three cents to the cost of the loaf. Some crack to the man with a large family. What influence induced the change? Were there any profiteering bakers around?

I have been told that a bread inspector was appointed to see that the weight was put in the loaf, but he never inspected, instead he was given a clerical job in the police department.

Crack second.—From the board of health, with a regulation requiring all bread to be wrapped before it is exposed for sale, under penalty of fines.

How does it work out? Any good baker will tell you that bread wrapped in a sealed wax paper before it is allowed to stand at least two hours, to thoroughly cool off and allow the heat and gases to escape, will turn clammy and pasty, with a musty flavor and will soon mould. Some of which has been returned to the bakers. It does not improve the quality to seal it up. Wrapping added one cent to the cost. It's only a cent. Do the little things count. Let us see.

A family using three or four loaves a day, will spend ten to twelve dollars a year. Multiplied by the hundreds of families daily use, its cost amounts to something. Why the change? Was it the board's own initiative or were they inspired or nagged by some of the resolution passing leagues? Some one of them may have seen a loaf of bread accidentally dropped in the street. How many of the thousands delivered daily are dropped or soiled? Why did they pick out the loaf of bread that one has to buy, and pass over a whole store full of cakes, pies and pastry with their sugar and molasses coatings? Most attractive for files and germs of all kinds. But the little plain loaf of bread—must have a covering of at least brown paper, or its dress suit of fancy printed wax, or otherwise it will be a menace to the public health. This wrapping deprives the buyers of securing what they are paying their money for. Should there be a law to prevent this? (Great in a glass case) you may be reported and summoned before the police magistrate and fined according to the regulation.

Do you wonder St. John has high priced bread? O! Ye inspired law makers! The extra 4c. paid by consumers amounts to a vast sum of money—enough to build a new city.

Another regulation made by the Board of Health some time ago. That all milk must be emptied out of the clean can it comes in, into a stone crock and retailed from it to the customer. (Sounds nice.) See how it works out. How many stores and places that sell milk have hot water, proper clothes and cleansers to clean an eight or twelve quart vessel? Is any vessel more cumbersome to wash and keep clean than a large crock with its wide open top the whole day of the crock, where the flies, germs and invisible dirt may light into the milk? It is almost impossible to keep the cover on all the time, especially when busy.

The only reply one member of the board made when the regulation was brought to his notice was that it was a beautiful idea. If you don't put your molasses, vinegar, flour, meat, sausages and the hundred and one foods that come in bulk into this beautiful stone crock.

In discarding the care and cleanliness of milk and milk products before the Farmers and Dairymen's Association in Moncton, the writer brought the board's regulation before them. Several objections were made. Some said it was too silly a regulation. It is well known that the less handling and trimming over of goods, especially foods, the better they will be. Some short time ago, our highly medicated and expensive Board of Health with its New York size health act, handed down to us by our local government (by the by, it reminds one of the old nursery rhyme:

They have doctors of Divinity  
Doctors of Divine,  
Doctors for the clocking hen,  
Doctors for the swine.)

Reports that a very large quantity of unclean milk has been sold in St. John. "Question." How much does the above health act, handed down to us by our local government tend to impair and add dirt to our milk? The latest crack to our milk supply and cost according to the propaganda running in the press. And by a decree of the Board of Health we must be out in force, whether the people want it or not, except they take it like Topsy—"Specks it is good for them."

That all milk be pasteurized. Where so many of the doctors or bacteriologists disagree, how is the poor layman to judge which is right. This he can estimate.—The cost to pasteurize, centralize and monopolize the entire milk supply that comes to the city with an expensive bottling system, cost or loss, and the added cost of distribution. It may add four, three or at least two cents per quart to the cost. How will it effect the man of moderate means. Would it reduce the amount he will be able to get for his family. It will take many more tag days to save the babies. Soon we will be regulated from the birth of a child to the burial of a corpse, and the end is not yet. "Tis useless to point out defects, unless you supply the remedy. First, give back to the people their liberty of buying the large unwrapped well raised loaf, and allow those who want the small close wax paper loaf their privilege of buying it, for there are some who like that kind. That is the bread law in the largest city in Canada. Second, remove the silly regulation requiring all milk to be emptied from the can it comes in into a doubtful clean stone crock. Third, let the board con-

## GIVE HONOR TO MEMORY OF COL. MOULSON

Many Floral Emblems and a Large Attendance at the Funeral of Pythian Veterans.

A large attendance of relatives and near friends marked the private funeral service of James Moulson at his late residence in Winter street, last night, Rev. F. H. Bone officiated. This morning the body was taken to the Pythian Castle, in Union street, where it lay in state until 2 o'clock in the afternoon. Members of the Knights of Pythias formed a guard.

The funeral service this afternoon was with full Pythian honors. Rev. David Hutchinson, D.D.; Grand Chancellor, James S. Lord, of St. Stephen; Rev. F. H. Bone and Past Chancellor, E. E. The bodies of Mr. Moulson's immediate relatives will be reinterred in this special plot.

A great number of Colonel Moulson's fellow knights and of the public generally attended at the Pythian Castle this morning to view the body and to raise dais in the centre of the auditorium, about which were draped the colors of the Pythian order. On his breast was placed the fifty-year jewel presented to him only a fortnight ago and which is the only one in the British Empire.

Around the bier in great profusion were placed floral tributes, including Pythian shields in colors, triangles and other emblems of the order presented by New Brunswick Lodge, No. 1; Union Lodge, No. 2; St. John Lodge, No. 30; Tower Lodge, No. 37; Loyalist Temple, No. 13, Pythian Sisters; Adia Temple, No. 157, D. In the afternoon the hall was filled to overflowing for the funeral service. St. Mary's Band played recessional music throughout the service, and Mrs. E. J. Gunn presided at the organ for the playing of the hymns, "Abide With Me," "Oh God, Our Help in Ages Past," "Sun of My Soul, Thou Saviour Dear."

The pall-bearers were Past Chancellors Bayard Shilwell and W. C. Thompson of New Brunswick Lodge, Past Grand Chancellors Dr. F. L. Goddard and LeBaron Wilson of Union Lodge; Past Chancellor J. Cecil Mitchell of St. John Lodge; and Knight Edward L. Carleton of Tower Lodge. A Pythian military guard of honor in command of James E. Arthur flanked the pall-bearers.

## MONTREAL STOCK EXCHANGE.

Montreal, April 26.—(10.30).—Further trading was seen in the Canadian market on the local stock exchange today, and while the tone is far from bearish, the bullish tendency is not nearly so prominent. Atlantic Sugar appeared at 21 3/4 after closing at 22 1/2 last night. Breweries were also noticeably weaker, selling a half down at 57. Steel
