

Alleged to have been made here to-night by the fishermen from the Miramichi. The fish were taken on the coast of Miramichi, and were of the same size and quality as those taken on the coast of Miramichi. The fish were taken on the coast of Miramichi, and were of the same size and quality as those taken on the coast of Miramichi. The fish were taken on the coast of Miramichi, and were of the same size and quality as those taken on the coast of Miramichi.

The Hon. Mr. Dingley has referred to the measures adopted by the Canadian Government on the subject of the reciprocity treaty of 1885. Your fishermen enjoyed all the privileges of our fishing for three years, later, or until 1889 during the time reciprocity was made. Your fishermen enjoyed all the privileges of our fishing for three years, later, or until 1889 during the time reciprocity was made.

Our people have not been successful in the fisheries. The fisheries of the two countries are identical, and for my part I am willing to concede that such relations should be made as will enable us to deal together with justice to both parties. (Applause.)

### Miramichi and the North Shore, etc.

The AIMS House New Year dinner report came too late for this week. Miss BURTON, Mr. R. N. Doherty's son will be at Miramichi River, Kent, was burned last Thursday night.

FISHMEN'S INTERVIEW.—A meeting of the Miramichi Fishermen's Protective Association to be held at Chatham, N.B., on Monday next, 9th inst. at 3 p.m. A full attendance is requested as matters of importance to fishermen will be discussed.

CHATHAM.—On a letter to make room for the lumber statistics of the past season, as contained in Mr. J. S. Snowball's Miramichi Wood Trade Circular, we are obliged to crowd out local and other matter, which will appear next week.

CHATHAM.—At the annual meeting of Chatham Gas Light Company, held at Masonic Hall yesterday afternoon, the following officers were elected for the current year: President, T. P. Gillespie, President, Robert Hocken, Treasurer, M. S. Hocken, Secretary, John Ellis, Donald McFarlane, J. A. Snowball, Dan'l Ferguson.

BAKERS' SOCIAL AT BLISSFIELD. A very largely attended and successful concert and banquet social, given up by the residents, the popular teacher, Miss W. H. H. and the trustees of the Blissfield No. 21, Blissfield, was held in the School House on the evening of Monday, 26th inst. The programme of an hour's length, consisting of music, instrumental and vocal, dialogues, recitations, etc. was first class in all its parts; but the instrumental music on organ and date by Miss and Mrs. Bamford deserves special mention. The very pretty and well-lighted hall, brought good prices from live, live, and the refreshment table were well patronized. Mr. John A. McDonald was chairman and Mrs. Emily Bamford, the proceeds, less all expenses, amounted to the sum of \$100.00 and will be used in putting the Blissfield House. About 11 o'clock dancing was begun and continued till after 11. Splendid order prevailed and all present vouch for the social of the season.

CHATHAM. The regular risks of the Chatham Curling Club were made up on Wednesday evening of last week and are as follows: The first name on each being that of the skip, the best, male, and so on to the last.

### MIRAMICHI ADVANCE, CHATHAM, NEW BRUNSWICK, JANUARY 5, 1888.

to be of the Ayraute and Norfolk breeds. The alleged Norfolk bull proved to have horns and there was no doubt he was not of pure breed. But nothing came of it. And now comes the further question. To the latter fortunate class belongs Mr. Charles A. Johnson, No. 375 W. Ohio Street, Chicago, and who was the lucky holder of one-tenth of ticket No. 13,646 which drew the first capital prize of \$100,000 in the October drawing of the Louisiana State Lottery. A traveler found Mr. Johnson, a very intelligent young man, twenty-seven years of age, a cabinet-maker by occupation, who, six years ago, came to America and found employment at his trade in Chicago. Having three times before purchased tickets in the lottery and drawn nothing, his joyful surprise was great when he found that his last investment had brought him a return of \$10,000. Chicago, Arkansas, Traveler, Nov. 5.

The Fisheries Commission. A Washington correspondent telegraphs to an American paper:—When the fisheries negotiators come together again next week, it is believed that the British commission will be able to secure the other of the proposed Secretary Bayers made to them. They understood very plainly, when the conference adjourned for the holidays, that representatives would agree to only one thing, and that named, first, the cessation of the commercial rights we claim for our fishery vessels in return for the commercial rights we accord to Canadian fishing vessels, or, if an alien is found in this question, to get together the three-mile limit question to arbitration. Not only was this firmly impressed upon the British commissioners, but also upon Mr. Foster, minister of marine of Canada, and the other Canadian officials who were here. In the conference now taking place at Ottawa, the only question to be considered is which of these propositions shall be taken. Sir Charles Tupper practically rejected the first one, and the British commissioners, so that it is more probable that when they return, Mr. Chamberlain and he will be authorized to accept the second.

Supernatural. Buckle says that superstition has done more to retard civilization than all other influences combined. Looking at the present condition of the world, therefore, there seems to be warrant for the belief that superstition is almost a thing of the past. And yet this is not the case as people think. A report recently made to the Boston Society for Psychical Research by its Committee on Experimental Psychology states that the following among other questions were addressed to nearly eight hundred persons. First—Should you be influenced by any feeling (belief or not) in immateriality in regard to sitting down thirteen at a table?

Second—Or beginning a voyage on a ship?

Third—Or seeing the new moon over your left shoulder?

Fourth—Or in choosing a house which was reported to be haunted?

Replies were received from about five hundred of the persons thus interrogated, and the results were as follows:—In answer to the first question, they showed that one-tenth of the men and one-fifth of the women who answered were subject to superstition. When the general enlightenment of the present age is taken into consideration these proportions seem very large.

How to Get More Eggs. It is a fact but little known to people in this country, that the first part of a hen's egg is the most fertile. The approach of disease, in the ovaries or of producing organs.

Excess of fat, exposure to wet and cold, condition, spreading feathers, impure food, and the want of care in the approach of disease, in the ovaries or of producing organs.
