CHOCOLAT MENIER
A Common Error.
Chocolate & Cocoa are by many supposed to be one and the same, only that one is a powder, (hence more easily cooked,) and the other is not.
This is wrong--
TAKE the Yolk from the Egg,
TAKE the Oil from the Olive,
What is left?
A Residue. So with COCOA.
In comparison,
COCOA is Skimmed Milk

The first needles that were made in England were fabricated in Cheapside, in the time of Queen Mary, by a negro from Spain; but as he would not impart the secret, it was lost at his death, and not recovered again till 1566, in the reign of Elizabeth, when Elias Growse, a German, taught the art to the English, who have since brought it to the highest degree of perfection.

A statistical writer in the Edinburgh Review cites various authorities to prove that the wealth of the United Kingdom exceeds £10,000,000,000; that of France £8,000,000,000; that of all Europe, £40,000,000,000; that of the United States, £14,000,000,000. If we place the wealth of the rest of the world at £26,000,000,000, we shall arrive at an aggregate of £80,000,000,000. We should have, we may add, to multiply this vast sum 30,000 times before we reach the total to which, according to M. Jannet's ingenious authority, 100 francs accumulating at 5 per cent. compound interest for 700 years would grow—says an exchange.
