**You can take control of genital herpes**

**...and your life**

Coping with recurrent symptoms such as itching or burning pain, tingling, sores, or even localized redness in or near the genital area has never been easy. Add to this the emotional impact of guilt, resentment, depression... a disruption of daily life.

Advances in medical research now enable you to do something about genital herpes outbreaks. A greater understanding of genital herpes — plus the

availability of affordable treatments, and counselling — can help you get your life essentially back to normal and potentially keep outbreaks out of the picture for years.

To confidentially learn more about reducing the severity and frequency of genital herpes outbreaks, and minimizing the risk of transmission through safe sex guidelines, contact the National Herpes Hotline.
