

- lood,
- 35. Does his health permit a tuberculous patient to continue at work?**

Usually it does not; it depends on the stage and severity of the case and the nature of the work.

- al of
- 36. Can the disease be cured?**

fact

Yes, when not too far advanced. The number of cures is increasing every day, particularly of cases taken in hand at the very start.

- 37. Can it be cured without treatment?**

rer-

No; cure is a matter of weeks and months of constant carefulness.

- 38. Is any particular remedy known, which is a sure or recognized cure?**

t a

No; though possibly the future may furnish such.

- ec-
- 39. What, then, is the method of treatment which gives the best results?**

Life in the open air, sunlight, strengthening food in abundance, and rest under medical supervision.
