l chronic digestive  
years; has gastric

dyspepsia characterized by pain, load, weight, gas acid  
and bitter pyrosis; could eat but few things, butter  
especially distressing her; constipated and costive since  
girlhood; for years had a sense of pressure in the rectum;  
at times, of late, has had it all the time. Flushing first  
given the 16th of May, 1887, twice per week, at bedtime.  
At first they produced pain and nausea, and once vomit-  
ing followed. These adverse symptoms were relieved  
when the water passed. The discharges from her bowels  
were simply enormous. They were continued until she  
passed yellow feces. On the 28th of June she was eating  
everything. She has become a good breakfaster. On  
the first of August she was doing all her own housework,  
the first time in three years.

Case IV.—Miss C., age 30, always constipated. Very  
muddy complexion, chloasmic spots all over her face,  
capricious appetite, seeks relief for a progressively in-  
creasing nervousness, which has been upon her for the  
past three years, and is very much worse in the past six  
months, and threatens to lead her to a suicide's grave.  
She experiences sudden misgivings; she has nervous  
prostration, colon filled to an enormous extent. Flushing  
was used and continued daily for a period of one month,  
when she reported that she was better in every way,  
does not give out any more; is stronger in all things;  
her complexion is clearing out; the chloasmic spots are  
unchanged; the appetite decidedly vigorous. In this  
case the fecal reliefs were enormous, and the improve-  
ments so rapid that there was no question of there being  
cause and effect.

Case V.—Mrs. A., age 34, has been having epileptic  
convulsions since April, 1883, two years subsequent to  
her only confinement. Immediately after her confine-  
ment, in February, 1881, she began to experience nervous  
symptoms, such as numbness, twitching of the left side  
of the body; these increased until convulsions began in  
April, 1883. From that time until the 1st of May, 1887,
