

85 to 86 a cwt. Lambs are quoted sold at Buffalo at 85 to 86; yearlings, \$4.75 to \$5.25; wethers \$4.25 to \$4.50, and ewes, \$4.75 to \$4 a cwt.

There was no change in prices for hogs, which at the beginning of the week lowered prices were looked for. Selects were quoted on Th:rsday at \$5.50 and lights \$6.65 fed and watered at the market. At Buffalo heavy, and mixed are quoted at \$5.50 to \$7.00; Yorks, \$6.50 to \$7, and dairies at \$5.50 to \$6.90 a cwt.

THIS WEEK'S HOG PRICES

At writing, the William Davies Company, Toronto, had not decided what their exact price for hogs would be this week. It is probable that it will be \$6.50 f.o.b. at country points. The buying just now is for September bacon market, and as the usual fall slump in the price of bacon begins about that time packers are preparing for it. When poultry and game become plentiful in the British market, the demand for bacon falls off somewhat. The supply of hogs just now is about normal.

PETERBORO HOG MARKET

Peterboro, Ont., August 1, 1908.—The market is very weak. Cables from the Old Country and the United States have caused this. The deliveries of Danish hogs on the English market are very heavy. The deliveries of hogs in Canada are light and it is only this that is holding the market where it is. As soon as the deliveries become larger prices will drop. The George Matthews Company quote the following prices for this week's shipments: f.o.b. country points, \$6.50 a cwt; delivered at abattoir, \$6.65.

MONTRAL HOG MARKET

Montreal, Saturday, August 1.—The market for live hogs is quiet and unchanged from last week, and prices have ruled for this week's offerings at about 82 cwt. for selected lots weighed off cars. The tone is strong and any increase in the demand, or falling off in the supplies, would tend to higher prices.

EXPORT BUTTER AND CHEESE

Montreal, Saturday, August 1.—We have heard several sharp advances in the market for cheese owing to an increase in the demand from the other side. On Thursday the boards all over the country sold at 12c, and as high as 12.5c having been paid at Kingston, and Friday's and Saturday's boards ruled at about the same. The treatment in the country was immediately followed by higher prices here, and dealers seem to have had no difficulty in selling their goods over the cable at two or three shillings advance over the prices current at the beginning of the week. The British importers as well as the local dealers are beginning to realize that the make

of cheese in Canada is short, and there is not the slightest prospect of it being made up now, and this no doubt accounts for the high prices that have been ruling of late. A large proportion of the purchases at present are being put in cold storage on British account and this no doubt accounts for the comparatively small shipments going forward. The receipts continue steady and totalled this week about 9,000 boxes. This is considerably less than last year, but about the same as last week, and the week before. Whether or not prices will remain steady at their present rates depends altogether upon the demand from England. There does not seem to be any prospect of a serious set back. There appears to be a serious after this sharp advance, but it will not amount to more than a quarter or half a cent a pound.

Butter is easy on account of the falling off in the demand from the other side, and the comparatively heavy receipts this week, which show an increase over last week, when a still further decrease was generally expected. Prices in the country ruled at 24c to 25c, according to quality.

MONTRAL PRODUCE TRADE

Montreal, Saturday, August 1st.—Butter.—There is a steady trade in butter, and prices are practically unchanged from those current last week. Choice prints are ruled at 25c, and standard quality quoted at 24 1/2c. Ordinary finest is quoted at 24c and under finest at 23c to 23 1/2c, according to quality. Dairy butter is quoted all the way from 22c to 23c.

Cheese.—There is a good demand for cheese from the local trade. Prices range from 12 1/2c to 14c according to quality and age.

Eggs.—The market for eggs is steady, and prices unchanged from last week. We quote selected at 30c and No. 1 stock at 30c, although there are some dealers asking one cent a dozen more money.

GOSSIP

The president of the Canadian Hereford Breeder's Association, J. A. Govlock, of Forest, has returned from a visit to Western Canada, during which he has visited Winnipeg, Brandon and other Belgian exhibitions. He states that the stock exhibits at these fairs were as fine as can be seen at almost any fair in Ontario. Mr. Govlock advises eastern breeders that when shipping pure bred stock to the west, to be sure and get their money before they ship, unless they know the men they are dealing with, for if notes are accepted in payment they may prove to be a good "Crops," he reports, are looking fine.

That live stock requires a certain amount of salt is unquestionable, but in the manner of feeding it there can be considerable improvement. Most breeders are content to throw a lump of rock salt on the ground, or in the

box, allowing the animal to lick up almost as much dirt as salt. A more sanitary method of feeding salt is being introduced among the breeders of Canada by the Salt Specialty Company. Their method of feeding the salt is by placing a salt cake in a stone-ware feeder, which allows the animal to obtain the salt free from dirt. The cake is made of over 99 per cent pure salt, pressed together by hydraulic power. This compound when placed in the feeder, which is located within easy reach of the animal, allows them to obtain salt whenever they desire it.

The Whitten, Drummond Company, of Toronto, are supplying the breeders throughout Canada.

HOLSTEINS

We must sell at least 25 cows and heifers at once, to make room for the natural increase of our herd. This is a chance of a lifetime to get the best of the breed, also have a few young bulls, Pontiac Farms, Imp., son of Henderson DeKok, the world's greatest sire, head of herd home and see them.

H. E. GEORGE
CRAMPTON, ONT.
Putnam St., 1 1/2 miles—C.P.R. 3-4-9
