Frost Fence First

# The Fence With Improved Weaving

# Built on Quality all Through

Quality is always the test of value especially in an article like wire fence that is intended to give long service. If you buy where you get the most rods of fence for your money, don't be surprised after a few years if you find the fence has failed to give you the service you expected.

We build our wire fence of the very best quality galvanized wire and we weave it in an improved way that is designed to give the utmost of service. Not only do we weave it with the extra tight lock, shown in this illustration, but we also make extra strong spring provision in the horizontals so that, like coiled spring wire, there will be strong reserve spring for future contraction and expansion.

These two improved features make Frost Fence well worth any difference in price because they mean increased service, to say nothing of the very neat and always tight and straight appearance of Frost Fence on the posts. When you figure the cost of Frost Fence by the number of years of service it will give, you will find it more economical than the cheapest fence on the market and all the time you will have a fence that will hold its tight shape and be strong enough to withstand any strain or weight that may come upon it.

We could easily produce a fence that could sell as cheap as the cheapest; but the greatly increased sale Frost tight lock fence is having every year proves that our aim of making Frost Fence the highest standard of quality is the surest way to build up a permanent fence trade. We know that if you will erect a Frost Fence this year you will want the same kind of fence next time.

If you don't know our local agent in your locality, write us for
