Northern Reduction Company, Limited, Toronto, incorporated, capital \$500,000 to carry on mining and smelting business. Incorporators, W. C. Mackay, F. D. Byers and others.

REPAIRING BROKEN SUBMERGED WATER MAINS.

A paper by Mr. Harry A. Lord, of Ogdensburg, N. Y., read at the recent convention of the American Waterworks Association in Toronto, told how he repaired a break in a 12 inch submerged cast iron pipe line, which had Ward flexible joints. The submerged pipe was 350 feet long, and was laid on the rock bottom of the river in a normal water depth of 8 feet. After seven years of service without mishap an ice jam broke a single length of pipe at a joint. The current was

very strong and the ends of the ruptured pipe were 15 feet apart. Following, in reverse order, the method employed by Mr. Ward in laying the pipe in 1898, the pipe was disconnected at the shore ends, and then pulled ashore by means of horses, a capstan, block and tackle. The joints were melted out with kerosene heaters as they came ashore. The disconnected pipe was cleaned, treated with waterproof metallic paint, reconnected, and then hauled back to position. A test showed that it was tight.

THE PRIESTMAN EXCAVATOR AND DREDGER

is used throughout the world. Will do more work with less labor, at a less first cost than any Excavator at present in use in Canada. For particulars write **G. P. WALLINGTON,** Canadian Representative, 11 Front Street East, Toronto

Supplied in 4 sizes on wheels or skids, with or without elevators, &c.

AUTOMATIC PILE HAMMERS

Reasons!

- They drive more rapidly and more economically.
- They require less attention during driving.
- They do not shatter the Pile.
- They can drive pile when the drop hammer cannot.
- They are no wearing out of hoisting lines.
- They drive more piles in a day.
- They usually leave the pile so that it need not be cut off.
- They make sharpening of piles or linearly unnecessary.
- Our catalog tells a whole lot more. A postal card will bring one.
