

EATON'S

BIGGEST STOVE VALUE

15⁵⁰

THE CROWN HURON RANGE is made of cast-iron, carefully tempered to avoid warping, and is exceptionally durable when used with coal as the fuel. We have proven this range to be a good baker, and economical on fuel.

THE FIRE BOX is fitted with duplex grates, easily operated, and makes a clean, free fire. The fire box is lined with brick.

THE OVEN is square plan, fitted with an oven rack and foot trip for opening door.

THE FLUES are so constructed as to force the smoke and gases to pass twice around the oven before entering the stove pipe. This feature saves fuel and heat.

THE TOP of the range is fitted with one reducing cover to fit different size pots. The balance of the covers are double, making them very durable.

THE TRIMMINGS All possible nickel trimmings are made removable, and with smooth surface. This makes them easy to clean. The trimmings are nicely arranged to give the range a very pleasing appearance.

THE FUEL The Crown Huron is constructed to burn coal only. Small quantities of wood may be used for summer purposes, but the best results are from coal. Our guarantee covers this range as a coal-burner.

ACCESSORIES Each range is sent out complete, including a shaker, lifter, poker, towel rod, ash pan and scraper.
