

Note the construction of the Kloled-Krotch Union Suit—sensible, comfortable, convenient.

A WATSON Kloled-Krotch union suit can by no chance prove uncomfortable. The Krotch is closed like a pair of drawers. Therefore, there is no binding, gapping or sagging. And there are no buttons between the legs, no loose bunching folds to rub and get into the crease of the seat. And yet as you see the seat flap is so constructed that it folds back, opening the entire seat.

Sold by nearly all good haberdashers.

"Take No Thought For The Morrow"

A modern life insurance policy will make it easily possible for any man to obey this precept.

Most of our worry is due to dangers that threaten those who are dependent upon us rather than to concern for our own fate.

Many brave men, who would not lose a wink of sleep thinking over their own future, spend anxious hours dreading what may happen their helpless children should death make them orphans.

The Mutual of Canada issues a policy protecting both the assured and his family. It is payable to the assured's dependents should he die before reaching a specified age, say 60, 65 or 70 years.

But should he attain that age, by which time his family would be self-dependent, the proceeds of the policy are payable to the assured himself.

This modern policy makes it possible to lay aside anxious thought both for one's self and for others. We will gladly furnish rates on application.

Is there a Mutual Policy in Your Home?

Official Experiments

Have proved conclusively that an application in the Fall of

Sydney Basic Slag

to grass lands, enormously increases their meat and milk producing value.

Prof. Somerville of Oxford University experimented on acre plots, and during a period of nine years the plot treated with BASIC SLAG produced an increase of 456 lbs. mutton over that of any other plot. This plot had received one application of Basic Slag at a cost of \$8. Do you know of any investment that will yield such returns?

You are keenly interested in producing at the greatest profit possible, and whether it be meat or dairy products that interest you most, one thing is certain, SYDNEY BASIC SLAG will help you to make more money.

Do not let this fall go by without making a trial of these goods. If we have no agent in your locality we will ship freight prepaid to your nearest station at \$20 per ton, cash with order.

We have just published a very interesting and descriptive booklet, which will be sent free on application to

The Cross Fertilizer Co., Limited
Sydney, Nova Scotia

See This Oliver Plow

PLOWING is hard work any way you look at it. Hard on the plowman, hard on the horses, hard on the plow. To make it easier without lowering the quality of the work or increasing the price of the outfit is the aim of the men who build Oliver plows for Eastern Canada.

To this end, the Oliver walking gang plow is designed. Two good horses and one man can plow two furrows at a time with this plow. By means of two levers with fine-notched quadrants, the depth and width of cut can be instantly adjusted to suit varying conditions in the field. The height of both furrow and land wheel can be changed, one at a time or both together, giving the driver absolute control of the depth and width of this cut at all times, without stopping the team. Another arrangement enables him to shift the furrow wheel sideways to straighten a furrow. Large or small bottoms may be used, and the distance between the beams changed to accommodate the change in bottoms.

See this plow first when you are ready to buy. It may save you lots of looking. If your work demands some other design, the IHC local agent who shows you the walking gang can show you an Oliver plow, either walking or riding, which will meet your needs and do for you the kind of work you want. But, whatever plow you are using, see the Oliver walking gang or write the nearest branch house for full information.
