BUCHANAN'S Improved, Double-Acting**PITCHING MACHINE**

FOR UNLOADING HAY AND ALL KINDS OF LOOSE GRAIN.

This machine can be used in barns, sheds or on stacks. It can be used to unload to either side of the barn floor without being turned around on the track, thus saving the trouble and annoyance experienced in climbing to the top of the barn to make the change. This is a special feature in my double-acting carrier, for which I hold letters patent for the Dominion, and hereby caution the public against buying from any others than me or my authorized agents, any infringement, as I will hold all persons using imitations liable for damages. This machine has never been beaten, either on a fair ground or in the barn, although it has been submitted to any test that the opposing makers could suggest, and proved to be a much better machine in the barn at work than on the fair ground empty. We will send this machine to any responsible farmer on trial, and guarantee satisfaction or no sale. Agents wanted in a great many parts of the Dominion, where I still have no agents established. Liberal discount to good agents, no others need apply, as we will not deal with any but good responsible men. Send for circulars and prices.

**THE COMMON-SENSE SHEAF LIFTER**

Works in connection with the Hay Carrier, and is the most complete apparatus ever offered to the public for unloading sheaves. No tearing the sheaves apart nor musing the load; leaves the sheaves on the mow in as nice a shape as they lay on the load. Price of Sheaf Lifter, \$5.00. Satisfaction guaranteed.
