LOCAL NOTICES.

THE SADDEST OF SAD SIGHTS.—The grey hairs of age being brought with sorgrey hairs of age being brought with soraow to the grave is now, we are glad to
think, becoming tarer every year as the use
of Cingalese Hair Restorer becomes more
general. By its use the scanty locks of
age once more resume their former color
and the hair become thick and luxuriant
as ever; with its aid we can now defy the
change of years retting assigned that the change of years, resting assured that no Grey Hair at any rate will come to sadden us. Sold at 50 cents per bottle. For sale by all druggists.

'OTTO" SILENT GAS ENGINE JOHN DOTY, ESPLANADE STREET, TORONTO. SAFETY! CONVENIENCE! ECONOMY!

THE NEW

No Boi ler. No Coal. No Steam. No Pumps No Danger. No Ashes. No Gauges. No Fires. No Engineer. No Explosions. No Extra Insurance. No Explosions. No State Insurance. No Unitersaint Heat. Almost No Attendance. Started instantly with a match! Always ready to give out its full power at once. Expense ceases when Engine stops!

When power is required at intervals it is the cheapest motor known. Over 3 500 in use in England and the United States.

DESCRIPTION.

n England and the United States.

DESCRIPTION:

Th Engine consists mainly of a jacketted cylinder, with piston, slide valve and governor having a cut-off mechanism to regulate the supply of gas according to the varying load on the engine. The pressure utilized into the cylinder, and at mee varied into the cylinder, and at mee value of the production of the power is generated into the cylinder, and at mee value to the combustion of a peculiar resture of common coal gas and air, which is lighted by a flame carried from a burning gast outside into the cylinder by the motion of the slide. The principle of combustion in this Gas Engine is entirely new; a small part only of the charge is combustible, which, on ignition, serves to expand the remainder, thus avoiding shock, and effecting—when compared with other mo ors of this class—a vast economy. The "OTTO" GAS Ensing is considered to possess the least number of working parts and the greatest simplicity of mechanism ever yet attained in a Gas Engine, or even in many Steam Engines. It runs with an extreme smoothness and regularity of speed hitherto unknown in Gas Engines.

larity of speed hitherto unknown in Gas Engines.

Cost of Running as Compared with Steam, and amount of Gas required.

The Gas Engine requiring no boiler, avoids all the expensive attendance or loss of time which the watening of water-level feed pumps and steam pressure gauge demand in a Steam Engine. The gas flows in freely, and there is no handling of fuel of any kind, and no ashes; thereby, hardly any item of cost, for attendance is to be considered—almost the total expense for running is for the gas alone. The quantity required in the "Otto" Engine, averages for the different sizes of engines, twenty-one and one-half cubic feet of gas per ind. Il. P., per hour, giving at the varying gas prices of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$1.00 to \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 cubic feet, a cost of from \$2.00 per 1,000 portant one.

One of these Engines is now in the Catholic
Record office, and we shall be happy to show
it to any one who desire to see it in operation.;
