An Educational Gathering. More than 1300 trustees and rate-payers have signified their intention of attending the annual meeting of the Ontario High and Public School Trustees Association at Toronto on March 29, 30 and 31. The average for many years has been about 100, whereas there are 20,000 school trustees in the province. The great majority of these delegates are from rural school boards, which goes to show that the people of Ontario are being awakened to the realization of the great opportunity afforded them by the public school in developing an intelligent and patriotic citizenship. The convention promises to be the beginning of a new epoch in the history of education in the province. The following are some of the subjects to be considered: Consolidation, Township School Boards, the Adolescent Act, Medical and Dental Inspection, Equalizing the Cost of High Schools over Urban and Rural areas. An opportunity will be given to discuss any subject relative to the administration of schools in the province. Delegates are being sent from every county and district in the province. The school regulations give boards power to defray the expenses of one or more delegates to this convention and school boards all over the province are taking advantage of this to get in touch with modern educational methods. Several Carrick Schools are sending delegates.
