MORE LIGHT ON NEWARK CASE

Murdered Woman Was Mrs. Young

Friend Knew She Was Planning to Join a House Party

NEW YORK, Dec. 30.-Some light was thrown today on the mystery surrounding the death of the woman, whose body was found half-hidden in a pond near Harrison, N. J., when Mrs. Frank Hull, of this city, in the company of Central Office Detectives, went to the morgue and said the woman was Mrs. Agnes Young, who formerly lived with her and later with a Mrs. King, in Brooklyn. FINANCIAL SURVEY

Will Go Down in History as Panic Year

In Spite of Strain, However, Conditions are Now Better Than When Year Opened

NEW YORK, Dec. 30.—The year 1907 has been one in which there has been much making of financial history. It will go down with 1857, 1873 and 1893 as one of the panic years in American finance, but despite the remarkable strain to which the financial structure has been subjected, the year closes with conditions stronger and safer than they were when the year began. The year opened with the feeling in

conservative quarters that speculation had already been carried to an unwarranted height and prudence was imposed by conditions upon bankers and capitalists. That this feeling operated to some extent throughout the year and that there was a scarcity of capital man. The loss of 19 points in Amalgamated Copper in a single day, 21 points in American Smelting, 22 in Reading and Womb, Painful or Irregular Periods, 25 in Union Pacific, added to considerable previous declines at a lower rate wiped out margins, compelling the calling of loans and wrecked the fortunes of many speculators.

It was not until mid-October that the storm broke in all its force with the collapse of the corner in United Copper, the appeal of the Morse-Heinze banks to the clearing house for help and the refusal to extend such help until the old control was eliminated. Events moved fast on the heels of hese revelations. The Knickerbocker Trust Company was cuosed October 22, after paying out about \$8,000,000 in cah. and runs began upon the Trust Company of America, which called for the lisbursements of \$34,000,000, and upon

the Lincoln Trust Company. The national banks have stood up inder the pressure much better than in the early stages of the crisis of 1893. The suspensions at that time were about 160 in the three months of June. July and August, although 84 banks afterward resumed business. The number of national bank suspensions hardly equalled a dozen during the recent panic, the most important being that of the National Bank of Commerce of
