NOT A NEW IDEA The proposition to make paper from sawdust is not by any means a new idea, though it is just now attracting ordinary reader that though the entire special attention here. As is well process of paper making is often conknown paper has in various ages of ducted in one establishment, it has the world been made from different materials, beginning with the Egyptian alone in some factories, and sell it in say, intelligent buyers would always reed, papyrns, from which paper takes this state. The reasons are easy of give me the first preference. To proits name. Not fewer than one hundred explanation. The process of pulpinventors have sought out since then, making requires considerable power, of all my newspaper advertising. I and secured by letters patent various and above all, abundance of clear, bure water. Water-power, the cheapand secured by letters patent various and above all, abundance of clear, fibre, asbestos, banana fibre, barks of est of motive powers, is often found cents for the same thing, when I can various kinds, bean stalks, sugar cane, in connection with the pure water, so make this element in my business unicocoanut fibre, cotton, flax, fresh necessary for pulp-making, and these versally recognized by the public, I water weeds, grass, fur, gutta percha, conditions determine the locality of hair, hay, heath, hemp, hops, husks of the pulp factory. Pulp, as a commergrain, jute, leather, leaves, manilla, cial commodity, is easily transportable moss, peat, turf, silk, straw, tan, in casks, while the paper making prothistles, wood, wool, and many other cess can often be more conveniently substances. It is known that the carried on in a city or at some centre Chinese, were acquainted with the art distant from where the pulp is made. Astor of making paper from pulp, artificially Besides a less investment of capital is prepared, as early as the Christian era. needed for one than for both processes And whatever material is now used in combined in one establishment. paper making, the process is, for near- Hence it occurs that pulp is shipped we can recommend it as the best way ly all, the same. The husk, rags, for long distances, even across the to get a good trade. Don't be afraid bark, fibre, wood or other substances Atlantic, and has a merchantable value first to be reduced into a fine, smooth according to its quality wherever pulp. Straw, and more recently paper is made. wood, with more or less admixture of rags, have been much in use in Canada VEGETINE does not act as a cathartic to ebilitate the bowels, but cleanses all the to make paper. Though not long in

tors, who natented processes of as follows:—Desgrand in 1838, Brow-Veagh. U. S. Attorney-General. The fore the close of the last century. It man in 1853, Johnson in 1855, Kelk, news quickly spread throughout the is at present found among whites of Martin, Pradeval, and DeFronteur in the same year; Chanchard and Amyot in 1856, and by Newton, Poriat, and was tendered, but the Marshal simply Italian priest who attended cases of Coupier about the same time. The replied to all enquiries that he could leprosy in the New Orleans Charity use of sawdust for the purpose was take no bail, and that he must go with thought of almost simultaneously with that of wood, and in 1852 very coolly. He has disposed of his Wilkinson, in England, took out a business, and has avowed his intention patent for his process of paper-making of raising an army as soon as he is afflicted with this ancient "scourge of from sawdust. He was followed by liberated and continue the manufacture of internal machines. He says Johnson with a patent for the same he sees in this the only possible way object in 1855. Until recent years the to right Ireland's wrongs. Mr. Crowe process of paper-making from wood is a sober, quiet citizen, but on this was confined to a few varieties of of the infernal machines designed to wood, the poplar being an early favourite on account of its clear white fibre, the ease with which it could be reduced to pulp, and its freedom from objectionable qualities: such, for inobjectionable qualities; such, for instance, as the pitch of the pine, which has hitherto proved an almost unsurmountable obstacle to paper making from pine wood. Spruce has of late from pine wood. Spruce has of late been a good deal used, especially in a shell in shape. It is 10 long and to inches thick, with a 2-inch thick band as bone, and they were able to handle fire with impunity. The disease is increased in the curable and unless the Legislature of the paper mills of New Brunswick, the centre of one end. The other end curable, and unless the Legislature of that wood being very abundant there. In making paper from wood the standing on its end it looks like a spread, it may become as widespread shell. Over the hole in the level end and ineradicable as in Western Asia. bark was first entirely removed, the is a stout cap of boileriron, filled carewood cut into chips by powerful ma- fully. The explosive material is placed chinery, and these chips boiled with inside this shell, the top closed with powerful chemicals in a generator the whole left to do its work. Even This is a sort of a fugitive piece and has under great pressure until the mass if discovered, it could hardly be denot found a place in any of the editions of was digested into pulp. The cost of terred from executing its purpose, for Mr. Longfellow's poems except the illustrated chemicals formed in this process a the set screws are so made that it is edition just being issued. It is one of his large part of the outlay in paper latest as well as one of his favorites, and make the outlay in paper ed, and it would be almost certain answer to the Sun, which expresses latest as well as one of his favorites, and making. More recently the grinding death to tamper with it after it was the regret that intexticating liquors process has been introduced in many set and ready for use, as the slightest were offered to the callers, many hay-

entirely dispensed with. OBJECTIONS TO SAWDUST PULP. It will at once strike the most casual Crowe will undergo preliminary exreader that sawdust could be much more easily made into pulp than could You cross the threshold, and dim and small solid logs of wood, and this is true. Is the space that serves for the shepherd's but there are several obstacles to producing a proper paper pulp from it, which all the ingenuity of inventors has been only recently, if at all, able to overcome. It has been already stated that in the first place the bark, being objectionable, has to be removed from the wood intended to be made into paper. The same is true of the doned christianity:-When this can be rapidly and cheaply much paper pulp half made.
