mated at 600; the loss of the British at mated at 600; the loss of the British. at 40. The marines drove the Arabs from the hills and forced them to retire to the plains; then the Indian troops charged upon the Arab position, but were outflanked and an unexpected body of Arabs succeeded in getting behind their line. The Indians found themselves between two fires and they fled. During the I two fires and they fied. During the retreat they were closely pressed by the Arabs, who hamstrung the horses and speared their riders. The Bengalese fell back in confusion upon the English infantry and the Gu ds, who had been formed in a hollow sq. and leisurely retired, while the Arabs were yelling that they had gained their lost position. At this juncture the artillery came to the rescue and a brisk fire of small shot from the machine guns and shells from the Krupp machine guns and shells from the Krup field mortars drove the Arabs from the ition. The marines maintained steady firing throughout the engagement, the honors of the day probably are to the Irish Lancers, who charged the l

and when they seemed almost hope-The British tro ps have returned to their former camp near Suakim. PARTICULARS OF THE FIGHT. square, the Guards on the right, infantry in front, the Indian contingent on the left and cavalry scouting in front and on the flanks. After seizing Col. Baker's old zerebra on the first hills the troops advanced through a pass debourshirs. advanced through a pass, debouching up-on a wide plain encircled by craggy hills of volcanic formation and found the en-emy on the hill to the left. The thunders of musketry then began. The enemy soon retired, some to the right but the main body to the left with the intention soon retired, some to the right but the main body to the left with the intention of cutting off the British rear. The Bendrous of the British rear is the sheet water this ways. gal cavalry started to checkmate this ruse and a determined fight ensued. The cavalry retired to allow the infantry to fire ary retired to allow the infantry to fire a volley on the Arabs. A 3 o'clock, the British greatly exhausted with their long engagement under a blazing sun, fell back. The troops were not molested during their return march to Suakim.

The total loss of the British was 11 killed SUAKIN, March 20,7 p.m.—The British troops have returned to this point. Osman Digna sent reinforcements numbering 1,000 to Hasheen on Thursday night to assist in opposing the British.
SUAKIM, March 22.—While detachments of English and Indian infantry ments of English and Indian inflantly were making a zereba seven miles southwest of Suakim to-day, they were suddenly surprised by a rush of Arabs who had been concealed in the defiles west of Hasheen. The English formed a square as quickly as possible, but the camels, mules and horses were driven back in confusion on the troops, causing a stampede, and amid clouds of dust the Arabs in Stove, Hall do., Lot Stove Pipe, Glassware, Pictures, confusion on the troops, causing a stam-pede, and amid clouds of dust the Arabs penetrated the south and west sides of the square. Meanwhile the marines and Berkshire regiment, who were on the east and west sides of the square, maintained a continuous fire, holding the enemy at bay, while a charge of cavalry and the charge from the guns at Hasheen zereba, checked the onslaught of the Arabs, which at the onset threatened serious disaster to the British. Considerable damage was done to the transport material.—The enemy, said to be 4000 strong, lost heavily. They fought bravely, and would neither give nor take quarter. The ent, who were on the east | Child's C neither give nor take quarter. The British loss is said to be 52 killed and 85 wounded. Gen. McNeil is blamed for not taking precautions against a sur-

TO ALL WHO DESIRE Water Supply by the Pierce System !

Pure Cold Water, sparkling and refreshing, from Nature's fountains in the solid rock or deep enough in the earth, that all impurities, foul drainage and filth are avoided.

To secure this we use one of the Celebrated Portable Artesian Well Drilling and Mineral Two men unload the Machine and set it up and are ready for work in one hour. For motive power for Drilling Machine, we use a steam engine (four horse) power.

If solid rock is to be penetrated to get a sufficient supply of Water, we drill a 7 or 8 inch hole through the earth or alluvial deposit, and down into the rock a few inches, using a water tight surface water and all drainage. We then use a six inch drill inside of the surface casing and goep enough to make a flowing Well if necessary.

Procuring a supply of good well water is only a question of depth, as it is a settled fact that water can be procured in every country at depths that can be easily reached with our portable machinery.

If the well is not made deep enough to flow, a small engine can be used or a wind mill erected, or the water be pumped by man or horse power, and the water be forced into a tank in top of the house (in tower of mill) or in any other convenient place, thus having an equivalent to a flowing well.

If a wind mill is read have the tank made large enough to hold and provided and eighty two, and made between the said Daniel Fraser and Jane Fraser his wife of the one part, and John S. MacLean of the County of Halifax, in the County of Rostigouche on the twentieth day of NOVEMBER and province of Nova Scotia of the other part, and John S. MacLean of the city of the other part, and John S. MacLean of the County of Restigouche and Indenture of Movagae and

The expense of sinking a well by the aid of our machinery is much less than the cost of the or-linary sunk or dug well, besides the inestimable advantage of always having pure and fresh water free from contaminating influences. dinary sunk or dug weil, besides the inestimate advantage of always having pure and nest water free from contaminating influences.

Persons who desire information about prospecting for minerals, oil, or want an estimate for water supply, or a well, should write us fully and describe the geological foundation. State if it is clay, gravel, sand, hard-pan, boulders, sand-stone, soap-stone, lime-stone, slate, shale, lime-rock, granite, trap, quartz, gneiss or conglomerite rock and the probable distance through each, especially the distance from the surface through the earth to the bed rock. Also state the distance from the surface through the earth to the bed rock. Also state the distance from the nearest river, height of banks, general depth of wells and the despect in the vicinity; if there are any overflowing springs near and the distance from the well, and if above or below the general surface. How far off is the nearest mineral spring and its character. The elevation of and the distance from the direction of the nearest highlands, also lowlands, and the highest elevated land within one mile and twenty to fifty miles.

\*\*The event of the said Daniel Fraser, and on the rear by wilderness lands, containing three hundred acres more or less and deeded by Robert Moffat and George Moffat to the said Daniel Fraser by deed bearing date the eleventh day of the delivence from the earth date of the retain piece or parcel of land situate lying and being in the Parish of Addington aforesaid and bounded as follows: commencing at a marked popular standing at the north-western angle of Lot number twenty-three granted to one John Johnson on the south side of the Restigouche River, thence running by the magnet South, one hundred and five chains of four poles each, thence long the banks of a reserved road, thence North one hundred chains to the South side of the Restigouche River, thence running by the magnet South, one hundred and five chains of four poles each, thence long the banks of a reserved road, thence North one hundred

land within one mile and twenty to fifty miles.

Among the many for whom we have drilled wells we are pleased to refer to the following from whom any information can be obtained if desired:—

Messrs. Geo. Chandler and Thomas Colwell, Dorchester, N. B., ; Messrs. Christopher Atkinson, and Sanford Barnes, Sackville, N. B.; Messrs. A. Robb & Sons and David Chapman, Amherst, N. S.; Rupert Coates, Nappan, N. S.; Ezra Bird, Fenwick, N. S.

Send for our circular. All correspondence for terms and other information to be addressed to A. P. COWIE & CO.,

MILLERTON, N. B.

Notice of Sale.

it may concern :-Notice is hereby given that under and by virtue of a Power of Sale contained in a certain Indenture of Mortgage, bearing date the seventeenth day of NOVEMBER in the year of Our Lord one thousand eight hundred and

well.

If a wind mill is used have the tank made large enough to hold water for at least one day's pumping to last through a calm. This solves the question of water supply. Pure drinking water n abundance can now be had from Nature's fountains beyond a doubt in any and every country on the face of the globe.

By this system good and pure drinking water can be obtained in any locality, in marshy or low swampy districts as in more favorable localities, the question being only one of depth. It never fails.

The expense of sinking a well by the aid of our machinery is much less than the cost of the ordinary sunk or dug well, besides the inestimable advantage of always having pure and fresh water for a contaminating influences.

of said river down the stream in an Easterly of said river down the stream in an Easterly direction to the place of beginning, containing two hundred acres more or less, the said Lot being known and distinguished as Lot number twenty-four granted to one William Harvey, his heirs and assigns by Her Majesty's Letters. Patent bearing date the twenty-fourth day of DECEMBER in the year of Our Lord one thousand eight hundred and thirty five together with the Island in front known as Bell's Island, lying and situate in the River Restiguoches.
