ONTO WHOLESALE MARKETS-WEEKLY REVIEW.

The market has been firm almost all over since sure hast; but the movement seems not to have been hirge, in consequence of small receipts and i dissignification on the part of holders to sell. There has been little of anything offered during the week, and the demand seems to have been sufficient to absorb all offering. It is now evident that there will be a very small surplus of spring wheth for export, and it is generally thought that the barley crop has been over-estimated. These facts, along with steadiness outside, have kept the market firm. Stocks have shown a slight increase during the week, and stood og Monday morning as follows:—Flour, 3,340 bibs.; fall wheat, 3,5,751 bush.; apriley, 413,469 bush.; barley, 570 bibs.; fall wheat, 139,561 bush.; apriley, 500 biss.; fall wheat, 139,561 bush.; spring wheat, 32,600 bush.; pers.; 62,500 bush.; and arrye, 5,555 bush. English salvices show markets to have been tending upwards during the week denotes the recipient would readily have been the supply, as explicitly and store to the corresponding date last year—flour, 7,160 bibs.; fall wheat, 139,561 bush.; spring wheat, 38,631 bush.; pers.; 62,500 bush.; and arrye, 5,555 bush. English salvices show markets to have been tending upwards during the present week, and store the supply, as cablegrams this week do not state imports. There were few cargoes for sial last week, and at foreign wheat was show, save for the finest qualities of Australia, and the supply, as cablegrams this week do not state imports. There were few cargoes for sial last week, and the trade in foreign wheat was show, save for the finest qualities of Australia, and foreign imports were few cargoes for sial last week, and the trade in foreign wheat was show, save for the finest qualities of Australia, and the state of the supply, as cablegrams this week do not state imports of wheat in sight on the south of the supply, as cablegrams this week of home-grown wheat and fines of home-grown wheat and fines of the supply has continued to the fine of the last; but the movement seems not to have a large, in consequence of small receipts and ast year. The total deliveries by farmers in the whole of the United Kingdom from August 29 to October 9 amounted to 961,952 qrs., against 368,548 qrs. last year; and the average price for the season was 11s. 5d., against 47s. 8d. in the correspond-ing period last year. It is now generally ad-mitted that the English and French crops have been ever-estimated, and that both England and ace will need to import more than was at cted, while it is also thought that this will have less to spare than was at first The exact extent of the errors n the first estimates, or the condition of the upply and demand in all the importing and exorting world, cannot be clearly seen, and the es, therefore, seem to be in favour of rather tled markets. But we see that Beerbohm the 15th ult., after a careful review of the situcludes :- "It must be openly confessed hat as far as can be now seen, it is not clear that here is any greater abundance in the present eal season than in the past one." 'Continental ices state that in France during the week on the 16th ult., the inland markets reed scantily supplied on the whole; farmers ged in the fields, thrashed but little. and for wheat continued quite active, ally as flour was easier to sell. German markets seem to have been ted during the week ending on the 16th ult. At Berlin wheat on the spot was generally offered in inferior qualities, and bought by millers. For forward delivery the market was at first very animated, in sympathy with rye, but could not keep pace with the latter article, and became flatter. Owing to the reaction for early terms of delivery, it came to this extraordinary result—that wheat for the current month was actually lower than rye. At Hamburg there was much excitement prevalent, caused chiefly hy the conviction that Germany would not be able to draw any supplies from Russia, in consequence of which prices of rye again advanced, and this article was actually dearer than wheat. Wheat and maise participated in the improvement, the latter being fully its higher. For test yellow Holstein and Elbe wheat 48s. 64s. per 30t lbs. fol. was being paid. American winter wheat was selling at 48s. to 50s. 64 per 50t lbs. fol. was being paid. American winter wheat was selling at 48s. to 50s. 64 per 50t lbs. fol. was being paid. The want of sufficient stuff on the spot threw speculation on "term" wheat, and caused a heavy advance, followed by a partial reaction. Latest advices from Austria-Hungary, state that at Posts wheat continued to rise, with small stocks and supplies; the large supplies of American wheatin Germany and other countries which usually buy in Hungary, were greatly chocking the export movement from the latter country is to be severe if read rumurs as to the prohibition of exports have been current this week, only to be finally declared without foundation. CATTLE.

TRADE—Has been quiet nearly all over.

Beeves—Offerings have continued to be very large in number and very poor in quality; of first-class export cattle, such as steers averaging 1,300 lbs. and upwards, there have been none in; nor has there been much demand for them, but if offered they would still bring \$4.50 to \$4.62. Good second-class have been wanted for the local market; light steers and helfers and good cows, averaging 1,300 to 1,200 lbs., would have brought \$4 to \$4.25, but scarcely any have been in, and the bulk of the receipts has sold about \$3.50 to \$3.75. Feeders have been abundant, but all wanted, and have sold readily at \$3 to \$3.50, the latter price for choice only. Third-class have continued to be offered—very foolishly we should say, as they would be first-class next summer—and have sold as low as \$2.50 to \$3, going but slowly even at these figures.

SHEEF—Have continued inactive, with offerings small but sufficient, and prices unahanged, at \$3.75 to \$4 per cental for first-class weighing, 140 lbs. and upwards, or from \$5.75 to \$6.50 per head, very few bringing over \$6. Second-class have been selling at \$4.50 to \$5.25 per head, and inferior not wanted.

CALVES—Have been inactive, with scarcely any offering, and prices almost nominal. First-class, dressing from \$10 to 125. lbs., have been worth \$6 to \$7.50, and second-class, dressing from 50 to 55.50. Third-class not wanted.

HIDES, SKINS, AND WOOL.

HIDES, SKINS, AND WOOL

TRADE—Seems to be fairly active.

HIDES—As anticipated prices of green declined 50c. on Thursday, and have remained unchanged since. Cured have been easier but selling well at 91 to 95c. for cars, but steers in small lots have brought 10c.

CALFSKINS—Scarcely any offering and prices nominally unchanged at former quotations.

SHEEPSKINS—Have been in fair supply and selling as before at \$1.29 for the best green, and sollows. The feeling seems rather better in fleece, but as buyers and sellers are still spart there has been nothing doing beyond the sale of a few small lots at 27c., which would be repeated to-day. Super has been easy but selling fairly well at 29 to 30c. for round lots; extra scarce and wanted at 35c., with one sale at that figure.

"ALLOW—Has been quiet but firm; rendered is tending upwards and wanted at 6 to 64c., but rough unchanged at 34c.

Trade has been quiet but steady through the week. No rush has prevailed for any sort of goods, but all have been going off fairly well. Prices are well maintained, but scarcely any change can be reported. Stocks are generally light, and held firmly with no disposition manifested to press sales. Sole is unchanged. Split are in good demand and remain scarce. Russets are still scarce and wanted. Canadian calf also is scarce, and good stock goes off readily, but cannot be said to have advanced in price.
