TAKES-OFF DANDRUFF, HAIR STOPS FALLING

Save your Hair! Get a small bottle of Danderine right now—Also stops itching scalp.

This, brittle, colorless and scraggy hair is sure evidence of a neglected scalp; of dandruff—that awful scurf. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverish, itchy itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair.

Get a small bottle of Knowlton's Danderine from any drug store. You surely can have beautiful hair and lots of it if you will just try a little Danderine. Save your hair! Try it!

An Optician of of Rare Ability

Mr. Chas. M. Dickson Has Few Equals in His Chosen Profession

To find one's calling and to follow it has been the fortune of very few persons of the present day, but such has been the case with Mr. Charles M. Dickson, of the firm of Dickson & Troy, who is an optician has few equals in all Canada.

When a young man, Mr. Dickson entered the employ of Mr. J. D. B. MacKenzie, to learn the drug business and in his daily work found opportunity to study optics, of which he grew very fond. He made such progress that he decided that it should be his life work, and a few years later went to St. John where he attended the Canadian College of Optics, and graduated with honors in 1905. Since that time he has been very successful in his work and, judging by the large number of satisfied customers, he has made good as an optician. However, always to be in the front ranks, Mr. Dickson, last year, at considerable expense secured the services of the eminent eye specialist, Mr. Frederick W. Mayor, of Toronto, to show him the shadow test system of eye testing, and so speedily did he master the new system that Mr. Mayor has declared that Mr. Dickson is as efficient, if not more so, with the shadow Test system than he was himself. By this system the optician is able to look into the eye and discover any thing that may be the matter, whether eyestrain from overwork, astigmatism, or any of the numerous diseases of the eye.

It is indeed a fortunate thing for Newcastle that Mr. Dickson has located here, as the need of an efficient optician is felt in every town, but there are few towns of the size of Newcastle that can boast of an eye specialist of the class of Mr. Dickson, and we predict for him continued success in his chosen profession.
