SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it

MALE HELP WANTED

WANTED—Boys to deliver The Evening Journal in Thorold district.

AGENTS WANTED

MAN to work this city refinishing chandeliers, brass beds, automobiles, by new method, \$10 daily without capital or experience. Write Gunmetal Co., 315 Elm, Decatur, Ill.

SALESMEN WANTED

Sell stock in Oil Companies. Make one thousand dollars week. Hundred dollars invested. Trapschoters paid Sixty Thousand. Supplies free. Write Big Southern Company, Fort Worth, Tex.

FOR RENT

FOR RENT—TWO COMFORTABLE furnished rooms for light house-keeping, 34 Chaplin Ave. m 25

APPLICATIONS FOR ROAD SUPERINTENDENT TOWNSHIP OF LOUTH

Applications will be received up to and including April 12, 1919, for the office of Road Superintendent, for the Township of Louth for the season of 1919. Services to commence 1st May.

Any application not necessarily accepted.

M. A. BALL, Clerk,
Township of Louth.
Dated March 14th, 1919.
m 20 27 a 10

can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keep you feeling fit day in and day out

C.P.R. MEN HAVE A GREAT TIME OVER WEEK END

Officers From Coast to Coast Gather at Old Quebec—Banqueted at Ritz Carlton Hotel

(Special To The Journal.)

Quebec, March 26.—Over two hundred officers and chiefs in charge of the executive appointments of the Canadian Pacific Railway scattered along the system from coast to coast and from the various centres of the United States agencies, visited the ancient City of Quebec over the week-end, and arriving on Sunday night by a special train made up of ten Pullman passenger sleepers and two dining cars, and some 150 put up at the Chateau Frontenac, while the balance were obliged to occupy the sleepers. The officials are in charge of Mr. J. McMillan, manager of the C. P. R. Co.'s telegraph system, and include representatives of the civil engineering department, legal department, store and purchasing departments, operating department, secret service representatives of telegraph system, dining and sleeping car service, passenger departments, land department and heads of the United States agencies, etc. The officials had attended a convention at Montreal, which ended in that city with a banquet given by the chief executive of the C.P.R. at the Ritz-Carlton Hotel on Saturday night.

The party broke up here yesterday afternoon at 1 o'clock by visiting the Quebec bridge, when many proceeded to their respective homes, and quite a few remaining over in Quebec for a couple of days to see the city. His Worship Mayor Lavigne, who had previously received an invitation to meet the officials on their arrival and dine with them at the Chateau, met the visitors and wished them welcome on their arrival. The dinner later served was absolutely informal; no toasts were proposed and no speeches made. Yesterday morning a number of the visitors proceeded to St. Anne de Beaupre to visit the shrine and get a glimpse of Montmorency Falls, while others made a tour of the city in sleighs and also paid a visit to the Louise docks and the military clearing depot.

Look's Cotton Root Compound

A safe, reliable regulating medicine. Sold in three doses: 10¢, 25¢, 50¢. No. 1, 25¢; No. 2, 50¢; No. 3, \$1.00. Sold by all druggists, or by mail on receipt of price. Free pamphlet. Address: THE COTTON ROOT MEDICINE CO., TORONTO, ONT. Canada.

The electors of Saltfleet, who defeated the Hydro by-law, have become repentant and want it re-submitted.

WANTED

A working man would like to make the acquaintance of lady about 32. A. Burley, General Delivery, Post Office, St. Catharines.

Be Your Own Boss start a cut-rate grocery business of your own. \$25 to \$50 invested should earn you \$25 weekly. H. V. Martin, Windsor, Ontario.

WANTED—A COOK GENERAL wanted. No washing, nice home, good wages, first class girl, references, 454 Queen street, S. Hamilton. m 24 25 26

A CURE FOR THE BLUES
Music is a sure cure for the blues, hence a Victrola will cure the blues for it means music of every kind. Why not call at Heintzman Hall, 68 St. Paul Street, and see some of these instruments and hear some gramophone records? Very easy terms can be arranged if desired.

WANTED—Don't throw those good old shoes away. Have them repaired at Sparkes Shoe Store. m 23

Jump from Bed in Morning and Drink Hot Water

Tells why everyone should drink hot water each morning before breakfast.

Why is man and woman half the time feeling nervous, despondent, worried; some days headachy dull and unstrung; some days really incapacitated by illness.

If we all would practice inside bathing, what a gratifying change would take place. Instead of thousands of half sick, anemic looking souls with pasty, muddy complexions we should see crowds of happy, healthy, rosy, cheery people everywhere. The reason is that the human system does not rid itself each day of all the waste which it accumulates under our present mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out else it ferments and forms poisons like poisons which are absorbed into the blood.

Just as necessary as it is to clean the ashes from the furnace each day before the fire will burn bright and hot, so we must each morning clear the inside organs of the previous day's accumulation of indigestible waste and body toxins. Men and women, whether sick or well, are advised to drink each morning, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it, as a harmless means of washing out of the stomach, liver, kidneys and bowels the indigestible material, waste, sour bile and toxins thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Millions of people who had their turn at constipation, bilious attacks, acid stomach, nervous days and sleepless nights have become real cranks about the morning inside bath. A quarter pound of limestone phosphate will not cost much at the drug store, but it is sufficient to demonstrate to anyone, its cleansing, sweetening and freshening effect upon the system.

SUFFERED TERRIBLE AGONY

"Fruit-a-lives" Alone Gave Him Quick Relief

Buckingham, Que., May 3rd, 1915.
"For seven years, I suffered terribly from Severe Headaches and Indigestion. I had belching gas from the stomach, and I had chronic Constipation. I tried many remedies but nothing did me good. Finally, a friend advised 'Fruit-a-lives'. I took this grand fruit medicine and it made me well. To everyone who has miserable health with Constipation and Indigestion and Bad Stomach, I say take 'Fruit-a-lives', and you will get well."

ALBERT VARNER.
50c. a box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-lives Limited, Ottawa, Ont.

The late Mr. H. L. Frost, the wire fence man, formerly of Welland and lately of Hamilton, left an estate valued at \$400,000 to his family.

USING MILKING DEVICES

When It Is Advisable to Invest in Milking Machines.

The Cause and Cure of Diarrhoea in Calves—Simple and Common-sense Methods of Treatment May Save Valuable Young Animals.

(Contributed by Ontario Department of Agriculture, Toronto.)

It is clear that if dairying is to develop as it ought to do in the Province of Ontario, more labor is needed on dairy farms. As the supply of labor is limited, cow-farmers are turning their attention to the mechanical milker as an aid to the biggest job on a farm where milk-cows are kept, namely, that of milking.

Past the Experimental Stage.
While it is true that mechanical milkers are not yet perfected, and possibly will never be absolutely "fool-proof," they have reached a stage of perfection where they can be recommended to the man who is in need of help at milking-time.

There are several machines now on the market which have proven to be more or less successful in tests made at Experimental Stations, but what is even more important, have stood the test of actual farm conditions. The advertising columns of the agricultural press contain the names of the leading makes of machines which can be purchased by milk-producers.

In answer to the question, will it pay to buy a milking machine? we would answer yes, under the following conditions:

1. Where a herd of twenty or more milking cows are kept, though we were in a stable recently where a man was using a machine to milk eight cows, and he considered it a paid him.

2. Where hand-milkers are not to be had, and where it means selling all or part of the herd, because of the difficulty in getting the cows milked.

3. Where a man desires to increase his herd but cannot do so, because hand milking is impossible.

4. Where a man has some mechanical genius and is willing to give the machine the necessary attention in order to make it a success. Not every man can get good results with a milking machine. The cows must be stripped after the machine, to insure "milking out clean."

5. Where a man or woman will give the necessary attention in order to keep the machine clean. It must be thoroughly washed and the milking parts kept in a solution of chloride of lime—one pound, dissolved in ten gallons of water. This must be changed about every two weeks, or as often as necessary to prevent contamination.

6. Where a man has the necessary capital (about \$500) to invest in a machine and does not have to borrow the money at a high rate of interest.—Prof. H. H. Dean, Ontario Agricultural College, Guelph.

Infectious Diarrhoea in Calves.
A form of diarrhoea in calves, known as "Scouring Diarrhoea," is not uncommon in calves, and the owners are often at a loss to account for it.

It is caused by a specific germ that gains entrance to the circulation, generally by the navel opening. It generally occurs as an epidemic in certain stables or certain localities, and as it is often fatal, causes great loss to the breeder.

The cause and results strongly resemble those of joint ill or navel ill in calves. The virus which causes the trouble exists in the stable or in the soil.

Symptoms.—At a variable time after birth, in some cases a few hours and in others a few days, the young animal suffers from an attack of acute diarrhoea, the symptoms of which do not differ markedly from ordinary diarrhoea, except from the fact that they seldom yield readily to treatment. The patient refuses to nurse or partake of nourishment, persists and death soon results.

Curative treatment consists in preventing the cause. When we know that the entrance into the circulation of a germ causes the trouble, it is evident that we must prevent in order that we may be successful. The building in which the calf is expected to bring forth young, and especially the stall, should be thoroughly disinfected. This may be done by sweeping and dusting thoroughly, and following by a thorough washing or scrubbing with a hot five per cent. solution of carbolic acid or one of the coal tar antiseptics, or a thorough coat of hot lime wash with five per cent. crude carbolic acid. The stall should be cleaned out daily and a little shaken lime spread upon the floor each time before supplying fresh bedding. The attendant should have a quantity of a good strong disinfectant on hand, as one of the solutions above mentioned, or a solution of corrosive sublimate, 30 grams to a pint of water. The writer prefers the latter.

The navel of the calf should be freely dressed with this as soon as possible after birth, and several times daily afterwards until thoroughly healed.

Curative treatment is often ineffective. The following has probably given better results than any other, viz.: Mix part formalin with 15 parts new milk and mix a teaspoonful of this with each part of milk consumed by the calf. When the calf is nursing its dam the mixture can be mixed with a small quantity of the dam's milk and given as a drench. The attendant estimating about how much it should get. When the calf is to nurse the dam it is well to wash the udder and teats with the solution before the calf nurses and once or twice daily for a week or so afterwards. When this is done the parts should be allowed to dry, and then be well rubbed with dry cloth before the calf is allowed to nurse.—J. H. R., Ontario Agricultural College, Guelph.

Thirteen thousand woolen workers at Passaic, N.J., who have been on a seven week's strike, returned to work on Monday.

THE GAS PLANT LOSSES.

Those who will take the time to analyze the civic budget as submitted by the Council last night, will notice that one of the reasons for the increase in the rate this year is the loss on the gas plant, amounting to over \$16,000, and this year up to June 15th, when it is to be closed down, to about \$5,000. This makes a total of over \$21,000, which is equivalent to a mill and a half. In other words, the increase in the tax rate for the present year of one and three-quarter mills is practically all made up by the deficit on this utility.

There seems to be, in face of the heavy losses which have been sustained, amounting since the plant was taken over to more than \$38,000, no other alternative as a matter of sound business than to close the plant. This may cause a hardship to some, it is true. It may be that they will find difficulty in getting the natural gas company to connect them up, but we feel certain that no council would be entitled to carry on a loss annually, which must be paid by all the people out of their taxes, to keep going a plant whose total number of users is small.

As previously pointed out, and as stated by the Mayor last night, the history and failure of this plant should not be held up as an argument against the public ownership of utilities. Conditions which have arisen to throttle the plant have been of an unusual nature and could not have been prevented whether under public or private ownership. Failures occur, too, with companies and plants not infrequently.

Their losses are, often heavy. Furthermore, while this one particular utility has been a source of loss there are other publicly owned enterprises such as the Hydro, which has been a splendid success. Conditions must be taken into account in a fair treatment of these matters.

The future of the plant may be no one can see, but it is evidently the policy of the present Council to close the operation and keep the system in as good condition as possible against whatever may develop in the next few years. There is one obvious fact, that the municipality would be violating all sound principles if it were to continue to operate the plant with a yearly loss which of course includes interest and sinking fund, of \$16,000.

"OUT OF THE SHADOW" IS BASED ON FAMOUS E. W. HORNUNG'S NOVEL

Pauline Frederick's New Film Has Exceptionally Strong Role for Star.

There are few who have not read E. W. Hornung's powerful novel, "The Shadow of the Rope," which was published several years ago and which has enjoyed a phenomenal sale. This story has been pictured by Paramount under the title of "Out of the Shadow," and it will be shown at the Griffin Theatre Thursday, Friday and Saturday, with beautiful Pauline Frederick in the title role.

Mr. Hornung has told in graphic style the story of a young Australian girl who weds a man, is treated with fardish cruelty by him, and when he is slain in self-defence by a pianist of whom he is jealous, the bride is arrested for his murder. She is tried, but acquitted, and later her innocence is established when the slayer confesses.

The young woman then learns to love a strong man and their love romance ends happily for both.

Miss Frederick is supported by picked players, her leading man being Wyndham Standing. Others in the cast include Ronald Bryn, William Gross, Emma Campbell, Jack W. Johnson Syn De Conde and Catharine Thomas.
