LOCAL INDUSTRY ENGAGES VISITORS

Pulp and Paper Business of Niagara District Interested Two Hundred Technical Visitors From the United States.

Upwards of two hundred representatives of the technical branches of the Pulp and Paper Industries of the United States paid a visit to Thorold yesterday and were given a most enjoyable time. They came over from Buffalo and were met with automobiles near Thorold by the business men of that town and taken in cars to various paper manufacturing plants. During the tour they visited the Ontario Paper Co., Interlake Tissue Paper Co., Riondan Paper Co., Lincoln Paper Mills, the Provincial Paper Co., the Beaver Board Co., the Foley Pulp Co. and the Kinloch Paper Co. of St. Catharines.

At Thorold a luncheon was given to the guests by the manufacturers and members of the Board of Trade. Mr. Carruthers presided. Several brief addresses were made. St. Catharines was represented by Ald. J. E. Riffer the Mayor, being unable to attend. Ex-Mayor Burgoyne was also present. The importance of the paper industries in this district was referred to and appreciation was expressed by the visitors for the hospitality extended to them.

AMAZING FIGURE ASKED FOR WORK

Lowest Tender for Construction of Public School Takes Breath Away From the Trustees.

So high was the lowest tender received by the Public School Board for the construction of a one storey school in this city that the Board may be unable to proceed with its original intentions with respect to building. The price asked in the tender was \$155,000 which is many thousands of dollars above what was expected. The consequence is that the Board is not about a good deal with its programme for the season. It is understood to be possible that unless much lower estimates can be secured the construction of two new eight roomed schools this year may have to be abandoned.

STRIKE NAMES FROM UNION

Vice President of Railway Brotherhood Says Those who Defied International Authority Will Have to Suffer.

WINNIPEG, June 15.—Union members of railway running trades who went on strike in defiance of international authority will be struck off the membership of their organization. James Murdoch, Vice-President of the Brotherhood of Railway Trainmen, declared yesterday that every man who walked out will be disqualified.

In cases where the majority of a lodge's membership are on strike or a lodge refuses to expel striking members, brotherhood charters will be withdrawn immediately. Neither railway or brotherhood officers could give definite information as to the number on strike. Mr. Murdoch admitted that a "considerable number" from the railways walked out, and stated that Canadian Government lines probably would be affected to a greater extent than the Canadian Pacific. Executive officers of all lines declared that service would be continued without interruption of a serious nature.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes any one look and feel clean, sweet and refreshed.

Wash your self on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels: thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion, others who have bilious attacks, acid stomach or constipation are assured of pronounced improvement in both health and appearance shortly.

PRINCIPAL LET GO AFTER LONG SERVICE

REGINA, SASK., June 15.—Dr. Norman E. Black, Principal of the Regina Collegiate Institute for the past ten years has been given notice by the board that his services will be no longer required after June 30th. Four other members of the staff are in the same position. In the case of three of them they are being let out to find position for members of the staff returning from overseas. No successor to Dr. Black has been appointed.

In the opening game of the International series Scottish on Saturday afternoon defeated Canada by 5 to 1.

ONTARIO'S BIG CROPS

Ensure Equal Crops Next Year by Attention to Seed Grain.

Larger Profits From Live Stock Made When Stables Are Given Thorough Clean-up—Live Stock Thrive Better In Dry, Well-Ventilated Stables.

(Contributed by Ontario Department of Agriculture, Toronto.)

ONTARIO is fortunate this year in having a good supply of grain in almost all classes of crops. The more grain there is to select from, the better chance there is to get the very best seed for sowing in the spring. Too many farmers forget the seed supply for next year's crop until most of their grain is fed or sold.

If the best of this grain was set aside for seed at threshing time or taken from the grain bins before any of it was fed or sold, there would be less work of seed preparation in the spring and a foundation provided for better seed than is often sown. Small, shrunken or broken seed has a feeding value nearly equal to that of large plump seed. The following results of seed selection experiments conducted at the Ontario Agricultural College at Guelph will show, however, that there is very great difference in the value of these for seed purposes:—

Selections.	Weight per Bushel (lbs.)	Test of Seed	Yield per Acre, Bushels of Grain
Oats—			
Large Plump	33.2	1.9	62.0
Seed	32.2	1.8	54.1
Medium sized	31.8	1.8	48.9
Barley—			
Large Plump	49.5	1.5	53.8
Seed	48.8	1.5	54.4
Shrunken	48.1	1.4	46.0
Broken Seed	48.6	1.3	42.3
Spring Wheat—			
Large Plump	59.1	1.4	21.7
Seed	58.3	1.3	18.0
Shrunken Seed	56.9	1.2	16.7

(Oats were tested seven years, barley six, and spring wheat eight.) Selecting the best seed from that which the farmer has available will not only provide large plump seed for sowing which will produce the most vigorous plants and the largest yield of best quality, but it will very largely eliminate any weed seeds which may be in the grain. — Dr. C. A. Zavits, Ontario Agricultural College, Guelph.

Clean, Dry and Ventilate Stables. Cleanliness, dryness and good ventilation are hygienic conditions very desirable in the housing of all kinds of live stock. Horses, cattle, sheep, hogs and poultry all do better and are less liable to contract infectious and contagious diseases when kept under such conditions than when dirt, dampness and poor ventilation are found in the stables in which they are housed. Undoubtedly, outbreaks of infectious and contagious diseases do occasionally occur in the best built and best kept stables, but the danger of these spreading is much less than where unhygienic conditions prevail.

Without doubt good stock has been produced under stable conditions that were not of the best, but the chances of producing and maintaining good healthy stock are much greater where cleanliness, dryness and good ventilation in the stables are the order of the day.

Dirt of all kinds, whilst it does not itself produce disease, is liable to harbor and foster the bacteria or other germs that do cause infectious disease, hence, so long as it is lying around inside the stables it is a source of danger to the stock.

If there is one class of stable more than another in which cleanliness is desirable it is the dairy stable. Milk is an ideal food for many varieties of bacteria as well as for human beings or live stock, and many varieties of bacteria are always present in stable dirt. Consequently, when dirt or stable dust gets into milk, many contaminating bacteria get in with it. It is the action of these bacteria in the milk that causes it to spoil either by souring or putrefaction. Consequently, one step in the production of good clean milk is to have it produced where there is little danger of dirt or dust getting into it.

Dampness is a great agent in the spreading and fostering of disease. Perhaps the one disease that it is most liable to induce is pneumonia. Many horses are lost annually as a result of contracting pneumonia through being kept in low-lying, damp quarters. Dampness due to bad ventilation is very conducive to the development of various lung troubles with all kinds of stock. The damp stagnant air in badly-ventilated stables lowers the vitality, depresses the blood circulation and so puts the animals kept under these conditions in such a state as to make them ready subjects for the development of such diseases as influenza, pneumonia, tuberculosis and others. — Prof. D. H. Jones, Ontario Agricultural College, Guelph.

Binder for Stone Road. If a broken-stone road gets very heavy and traffic then it must be laid with a tar or asphalt binder to keep the pieces of stone from grinding on each other and finally powdering under traffic.

Time to Use Road Drag. If the roadway is full of holes or badly rotted the drag should be used once when the road is soft and slushy.

PLANS FOR A OF PEACE

Formalities to be Carried out by the Scale—Will Take an Hour to Affix Sign

PARIS, June 17.—Plans for formal ceremony on the signing of the Peace Treaty at the Chateau de Versailles in which the delegates have been withdrawn from the hotel in which they were staying when no definite date for the signing of the Peace Treaty was in prospect, and the signing was to take place in the hall of the Chateau de Versailles or the Council of the necessary approval be put into effect.

French officials, entrusted with arrangements for the ceremony, have been informed that everything must be ready by June 18th. They are elaborating project with sketches, time tables and plans for sample tickets for delegates, representatives of the press and spectators. They are out the routes for the delegates which will replace the routes of the former Peace Treaty. The project was forwarded month ago through the press for approval.

Unexpected delay arose in the project for the ceremony from the fact that it has been now for possible use about the month.

Staged in Hall of Mirrors. The actual signing, as announced will be staged in the Hall of Mirrors, so described. The delegates, who by automobile after the Bois de Boulogne and the Park of St. Cloud, where the residence of Napoleon will enter Versailles by de Paris—a boulevard yards wide leading direct to the main entrance of the chateau. The delegates will be public they will pass between the two main entrances. They will descend from the chateau at the doorway of the chateau which the Paris mob on the day of French revolution the chateau, massacred guards and compelled King Queen Marie Antoinette Paris.

Once Occupied by M. To reach the Hall of delegates will traverse apartment at one time, the monarch and his queen at either end of the Hall will be pulled off. At one of the privileged spectators, other will be the correspondents representing the newspaper world.

Probably only the President of the chateau at the ceremony, but who President Wilson, as a guest, is placed to the standards of the twenty-two associated in the war will out upon the chateau in a triumphal bunting.

It is expected that the signing will be timed to begin at 10 o'clock in the afternoon, as speeches by Premier as chairman of the Council by the head of the German delegation. The actual work of the signatures of the representatives of the belligerent nations will occupy well over an hour. The plenipotentiaries ceremony will leave the portal opening on the side, which many of the found the German delegates regarded as enemies along with the other plenipotentiaries.

CARRIED OFF

TORONTO, June 17.—The aid of a stolen automobile was a safe from a station on St. Clair Avenue. They made the spot in the country road and Eglinton Avenue they were seen trying to escape. Police Sergeant Constable Young motor but the thieves ran away saw the officers and let the motor they had from 511 Parliament Street.

THE WEAT

TORONTO, June 17.—has been very warm and comparatively cool in the morning. The Maritime Province light scattered showers in all the provinces.
