-VS.-Factory-Made.

Take up the printed announcements of makers and importers of Rerdy-made Clothing, and when they strive to give emphasis to the alleged merits of their clothing they in . variably tell how nearly they approach to tailor-made.

Here are some quotations : "Elegantly tailored," Cut and finished equal to ordered work," "Equal in quality, fit and finish to suits made to order," or similar statements.

Then tailor-made clothes are different from imported factory-made, otherwise there would be no need to make comparisons. If tailor made were not the better clothes they would not be held up as the ideal to which the ready-made strive to reach.

The fact is there is a great deal of difference between a factory-made imported suit and a tailor-made, in style and durability,

The man that is indifferent as to the appearance of his clothes when he buys them and when worn a month, may be satisfied with a factory-made, but if he has regard to looks and economy, he will buy tailor-made garments.

For those who are not disposed to give the prices usually paid for clothes made to special order and are not satisfied with the imported ready-made clothing, we have made, and are daily adding, Suits and Overcoats of superior workmanship that we are selling as low in price as imported makes. of inferior quality.
