Be Wise in Time.

It has long been apparent that handle the export fish business of Newfoundland on communistic principles. He looks forward to the day when the Government of the dominion shall be the only exporter, and the merchant-exporter be discarded as unnecessary middleman. When that time arrives, he proposes to be the Governmentas he is now-and therefore the only exporter. The Union Export Company will be the agent of the Government to collect and ship, and he will be the Company, as he is now. There will be no competition in that pective husbands may make a choice. aimed for day, and the producer will have to sell for the price Mr. Coaker decrees, and his Company will have the profit he

There are men in the fish trade here so blind as to the portents of the times, that they are actually helping along the day of their own destruction as independent traders. In their short-sighted greed, they are them. There were so many of the even now advocating the use of same name that great confusion ento purchase "Labrador" for the erally fought for the prettiest girl. present relief of the market and Greek churches in New York, recentthe ultimate share they hope to ly. reap of the profit from this rape of the Public Treasury. But have they asked themselves this question, "if it be wise to buy a quantity of "Labrador" with public money, why not buy ALL fish that way?" If they and Mr. Coaker now use public money for such a partial purpose, why should they not use it to buy ALL the catch next year? If it be proper to buy two hundred thousand quintals of fish with public money, or on public credit, why will it not be equally proper to buy all the fish that way and throw the exportermerchant into the discard for all time. The lesson that certain merchants are assisting Mr. Coaker to teach, in their insensate folly, may be too well learned for their comfort here-

It is time for the public to arouse up to the defence of their liberties. We have it on well authenticated report that another step in Bolshevistic Government is really about to be attempted, by the use of power autocratically to place the control of fish more completely in the hands of Mr. Coaker, not as a Minister of the Crown, but as the head of a Trading Company. Public money or public credit is to be used to put the control of for Sydney this morning.

"Labrador" into the hands of certain exporters, chief amongst whom will be the Union Export Company, which will be placed in the position to make a great profit for a group of shareholders, at the risk of ALL the taxpayers of the colony. Let these, latter, therefore, be wise in time. The warning is given.

The word "magnet" is believed by many people to be derived from the name of the city of Magnesia in Asia Minor, where the properties of the lodestone are said to have been discovered. It has, however, been asserted that the word comes from Magnes, the name of a shepherd who discovered magnetic power by being held on Mount Ida, in Greece, by its attraction for the nails in his shoes.

Clyde Arrives.

S.S. Clyde reached port last night from Port Union towing up the motor boat F.P.U. The Clyde which last week took to the northward flour exclusively for the Union Trading Company will take general freight this trip. The steamer which has been taken off her regular route will probably get away from here to-night.

Could Not Make Sale.

In all the downpour of rain this morning a fisherman with a yaffle of "Labrador" codfish under his arm travelled the town to find a purchaser without any success, up to noon hour. The fish was wrapped in paper and both the fisherman and his parcel presented a depressed appearance.

Consorzio Adamant.

Messages received in the city to-day by several fish merchants indicate that the Italian Consorzio, absolutely refuse to buy fish through Hawes & Co., adding further that the Consorzio is able to supply their needs with pur-chases from Iceland and Norway. A big effort is being made to have the Advisory Board cancel the agreement with Hawes and permit exporters to sell through their own agents. If this latter course is adopted reliable busi-ness men say, "it is the only hope of
