Discord Threatened.

Rome, July 21.—The Capitale says that all the European Powers will concentrate naval squadrons at Cadiz in order to be navai squadrons at Cadiz in order to be ready to proceed to Morocco where the question between France and the Sultan is becoming complicated and threatens to cause discord between France and the Powers interested in maintaining an equilibrium on the Mediterranean.

Due to French Intrigue. London, July 21.—The Times publishes advices from the British camp at Fez to July 16. The advices confirm the reports July 16. The advices commit the representation of Sir Charles Ewan Smith's mission which it is said is due to French intrigue. It is said a French mission will visit Fez in September with the object of negotiating a treaty similar to the one Sir Charles sought to negotiate.

No Wonder It Spreads. ST. PETERSBURG, July 20 .- The Nove Vremya, describing scenes in the cholera infected district, says: The Baku railroad fected district, says: The Baku railroad station was filled with a tunultuous crowd of fugitives. When the doors were opened the crowd rushed to the platform and overcrowded the trains. Many sat on the floor rather than be left behind. The stench of the atmosphere was suffocating. Frudent passengers—; their own and their neighbour sat the tongues and feels the pulse of the passengers. Everybody protests that be or she is in perfect health. The train then starts. Often within a few minutes a passenger is taken ill with cholera. The immates of the patient's apartment at once become paniestricken. The patient is removed and the place where he sat is sprinkled with carbolic acid and the passengers immediately refill their places. A similar scene occurs frequently. At each station the same perfunctory examination is made. No wonder cholera is spreading in Tillis and other places.

Gladstone in Good Trim.

London, July 21.—Mr. Gladstone left Pittochry for Chester this afternoon. He was given an enthustastic reception upon his arrival at Perth, and some of his admirers presented him with baskets of fruit and flowers. He looked well and showed no sign that his campaign had affected his health. His intimate friends deny the runners that he is in poor health. He drove 30 miles yesterday in an open carriage, a feat which, if the reports of his enfeebled condition were true, would have been impossible. In a short address he made at Kirkmichael his voice was good and showed no sign of weakness. Mr. Gladstone was heartly welcomed on returning to

Hawarden this evening. He is in good spirits and health, but he has lately been complaining of slight trouble in the eye which was recently injured.

Mr. Gladstone is communicating with the leaders of the Anti-Parnellite party in an endeavor to obtain an absolute assurance that the parto will support him with its whole vote in an attack on the Government by a "no confidence amendment."

ment by a "no confidence amendment."

Speaking to a little group at Kirkmichael yesterday while driving from Braemar to Pitlochry, he said: "Do not be discouraged because our nominal majority in the House of Commons is not very large. It will comfort you to know that I have sat in 25 Parliaments, and in five I have seen Liberal Governments in office doing a great deal of work for the country with not such a majority as has now been returned."

The Vossische Zeitung (Berlin) publishes to-day a dispatch from its London correspondent giving an account of an interview he has recently had with Mr. Gladstone. In reply to the correspondent's question as to what would be the attitude of the Liberal Ministry toward the different foreign powers, Mr. Gladstone said: "The results of the elections must not be regarded as affording grounds for any sudden changes of policy. It would be premature to discuss the policy of a Government which does not yet exist, and which is not furnished with official knowledge of public afairs."

The London Post on the Situation.

London, July 22.—The Post (Tory) this morning contained a leader headed, "Why resign?" which is causing a sensation in view of that paper's close relations with the Government. The evening papers all reprint the leader as a semi-official tip. The article says: "Assuming that the Opposition has a slender majority on the motion that the Government does not possess the confidence of the ccuntry, why should the Ministers immediately resign in view of the fact that they have not to deal with a compact Opposition, but only a disjointed horde of factions? How can Lord Salisbury and his colleagues conscientiously reconcile their duty to their sovereign and their party with an impetuous abandonment of power in consequence of the transient action of the horde which now disfigures the character and degrades the traditions of Parliamentary opposition? The Ministry the article concludes, "should not act beyond advising the sovereign to prorogue Parliament until the normal period of assembling arrives." London, July 22.—The Post (Tory) this

Reciprocal Relations

Interesting Debate in the United States House of Representatives.

Canada's Treaty Agreement With the States Endangered.

Why Both Countries Should Use the Canals on Equal Terms.

& Bill Passed Empowering the Presi dent to Shut Canadian Vessels Out of the St. Mary's Falls Canal.

WASHINGTON, July 21 .- In the House today Mr. Hooker, from the Committee or Foreign Aflairs, reported the bill to pro-vide for the calling of an international ar-

vide for the calling of an international arbitration congress.

Mr. Blount, from the Committee on Foreign Aflairs, called up the bill to force reciprocal relations between the United States and Canada. Mr. Blount said the President had in two messages called the attention of Congress to the fact that not-withstanding treaty rights American citizens were discriminated against in the matter of transportation through the Welland, St. Lawrence and other canals. A rebate was accorded to Canadian vessels which was not accorded to American vessels. This bill was designed to require that this discrimination should be abolished and that the treaty rights of American citizens should be preserved.

Mr. Lind (Minn.) inquired whether this bill might not be construed as an abroga-

matter to meet now, and that was whether or not the great lakes should be open to Canadian trade and denied to American trade.

Mr. Lind suggested that the United States received the free use of the St. Lawrence River in perpetuity. This was a very important right. We could build canals of our own, but we could not build a St. Lawrence River.

Mr. Blount thought the Government should stand manfully and heroically for the rights of the citizens and meet every emergency which arose when it arose.

Mr. Hitt (Illinois) said the pending bill was one that deeply concerned the people of the Northwest and the cities of the east—everywhere that the grain trade concerned American citizens. The grain producers sent their grain by the lakes and the canals and by railroads. Vast crops were sent by water during the water season and the mode of passage from Lake Eric to Lake Ontario was by the Welland Canal. American citizens. For that right they had paid a great price. It was a reciprocal privilege. We gave Canada the use of those great canals on which the Government had lavished millions of money. For that we were entitled to the use of the Welland Canal if we paid the same tolls that the Canadians did Every year great sums were spent for the St. Mary's Canal through which we welcome Canadian vessels to pass free. But while we did this we found that for every cargoe that passed through the Welland Canal we were charged ten times as much as were the Canadians. It was a bald fact that American trade was subject to ten times the exactions that Canadian trade was passing through the Welland Canal in For every \$5,000 paid on cargoes going to Canadian ports, \$50,000 was exacted from the grain raise and shipper of the Northwest.

OTTAWA, July 21.—Two well known arristers left here this morning for To-onto where they will argue in an important ase in which the Grand Council of Canada case in which the Grand Council of Canada for the Catholic Mutual Benefit Society, and the Supreme Council of the same order (which is practically a United States body) will oppose and better

The Grand Council of Canada some time ago made application to the Ontario Government for registration as an insurance society under the new act. When the Supreme (United States) Council heard of the applications they notified Dr. Hunter, the Ontario Registrar of Insurance, that they would appose the application. Hunter accordingly notified the Grand Council of the fact and set tomorrow as the day of argument.

It is stated the Supreme Council is opposing the registration on the ground that it would give the Grand Council of Canada too much control of the Canadian memors of the order and eventually lead to Canadian members organizing a distinct body. The Grand Council claims the Supreme Council has no right to interfere in a matter when they (the Canadians) are but obeying the laws of the land in registering.

the Farmers' Alliance.

New York, July 21.—The strike begun by the union housesmiths was augmented to-day by the calling out of the workmen employed on three more buildings. More than 800 men, including nearly all the trades represented in building, were taken off. It is computed that altogether nearly 8,000 men have in one way and another become idle through the trouble between the Iron League, who sanction the employment of non-union men, and the housesmiths. This number is likely to be swelled three or four fold within the next few days. At a meeting of the board of walking delegates it was announced that the bricklayers probably would join the strikers' ranks soon if some agreement were not arrived at.

A Dainty Ornament for the Lawn. One of the prettiest floral arrangements which the mind of woman ever devised is to oe seen of the lawn of a certain feminine suburbanite. It is a pline framework made to represent a three-leaved screen. It is about six feet high, and the panels are about two and a half feet wide. The panels are set at different angles, as one would naturally place a screen, and are strung with cords from top to bottom. Up these cords are rapidly elimbing the thick, green shoots of sweet pea vines, and already the panels are covered aimost to the very top. One panel, the center, is of pure white blossoms. The right hand one is of bright, almost cherry, red ones, and the left-hand one is of the prolific pluk and white variety. A daintier ornament to a lawn or a prettier nook for a tete-a-teto on summer nights could not well be imagined.
