## The Home-Furnishing Sections Are Specially Attractive Now

Next week the display in these departments will emphasize the great variety, exceptional character and moderate prices of the merchandise shown in each this season. The cheapness of many things offered is not at the cost of material or workmanship. The patrons of this store are not of the kind that are caught by huge markdowns, that are too easily stirred by buyers and sellers for advertising purposes. Our admitted importance to the makers of goods is increased because we refuse to deal in baits or decoy prices, to advertise lots with a few in a lot to mislead customers. Our most valued manufacturers will not lend themselves to the practice of exaggerating and reductions of values. There are many opportunities just now, and we are taking many lots for cash. It is a good time to buy. Every lover of home comfort and beauty should not fail to see home-furnishing displays next week.
