Major Prior made his first speech in tion. It has completely abandoned its Ottawa on the fourteenth instant, not, however, in his capacity as junior member for to hide its discomfiture behind a mass of Victoria, but as a member of the Dominion Rifle Association. The duty of seconding the vote of thanks to His Excellency the Governor-General, for his liberal contribution to the funds of the association, fell to Major Prior, and he performed the duty in a way to earn for himself the applause and enconiums of all present. After expressing regret that hands, he said that coming from the city of Victoria he well remembered the visit paid to that city by the Governor-General two years ago. His Excellency as the representative of the Queen was assured of a hearty welcome to British Columbia but before he left he won a warm place in the hearts of British Columbians by the interest he took in the country and its institutions and also by the humble and courteous manner in which he received every one who came in contact with him. "I can well understand proceeded Major Prior, "the sentiment of regard and respect that I hear every where in this place in reference to His myself after what has fallen from the President and the Minister of Militia. True to the instincts of every man born in from the Government of the day, or from the people of the Dominion in general, as a sport, but because it is considered essential to the welfare and safety of the country that our young men should be properly belonging to each of them; every literary society and mechanics' institute, any charitable, philanthropic or provident association which is or may be registered under the each of the respite which the act of 1887 afforded, providing that motions of eviction should replace actual enactments for a term of six months. The declared by competent authorities, and has also proven itself to be, second to no pide by the clergyman, and the land attached the provential of the provent other militia force in the world. (Applause.) I cannot help thinking more-over that His Excellency must derive a exempt temporary trestle-works, erected to fetter the action of the land'ords, but good deal of satisfaction from the thought that this efficiency has been brought about in a large measure by the generosity he has tion. I may add my voice to the general acts repealed. regret expressed on all sides as to the near departure of His Excellency from amongst us. I feel satisfied wherever Lord Lansdowne's duties call him, or whatever thought to the riflemen of the Dominion, by whom his acts have been so highly appreciated." Our genial representative retired amidst hearty applause.

UTILIZATION OF FIRE-DAMP.

If the experiments, which, according to Connected with operating the Paton of La Nature, are being conducted at the Wirm coal mines, near Aix-la-Chapelle, be paid by the corporation liable therefor mitted yesterday, and argued in support Wurst coal mines, near Aix-la-Chapelle, prove to be practicable for mines in full work, their originator will have earned the gratitude of miners and mine owners the gratitude of miners and mine owners and mine owners and mine owners while a school trustees, and shall become due and school trustees of the said school districts pelled to come into court all should be. It would be useless to protect the tenant from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord if he was still to be sub-from his landlord of Milan says that it learns that a marriage has been arranged between the Prince of Naples and Prince of N she gratitude of miners and mine owners all over the world. Not only has firedam been deprived of its dreadful power for mischief, but it has been brought under control and rendered servicesble. The Wurm pits, it seems, have been noted since first sunk for the amount of fire-damp generated in the workings, and coal-getting has been a troublesome and expensive operation owing to the numerous precautions necessary to prevent calamities. In spite of every care accidents were frequent, resulting in death dents were frequent, resulting in death of the municipal corporation, shall be served' upon the clerk of the municipal corporation liable there to the mines. At length Mr. Hilt, the said request or notice are named for that purpose; and should any connected at the surface with a powerful suction pump. The plan, having been tentatively applied, completely answered year. In order to ascertain and fix the once extended it so as to include all the workings. Having in this way cleared the atmosphere of the pit and rendered working safe and comfortable, Mr. Hilt next turned his attention to the utilization of the gas thus abstracted from the mine. Here success is also said to have attended his efforts. By means of a conditic connected with the suction pump, the gas withdrawn from the pit is gas withdrawn from the pit is gas withdrawn from the pit is gas someter. In the conduit wire gasometer is isolated, but from it pipes lead to two generators which are heated by the gas. The projector of this ingenious method of utilizing a dangerous and destructive compound says he is obtaining 30.500 cubic feet of fire-damp which distil 263 cubic feet of water. On which distil 263 cubic feet of water. On uniting the fire-damp of all his exploitations, he expects to have 64 cubic fact have feed and the projection.
