THE VICTORIA WEEKLY COLONIST FRIDAY, MAY 11: 1894.

The Colonist.

FRIDAY, MAY 11, 18

MISKEPRESENTATION EXPOSED.

An article which appeared in the New Denver Prospector some time ago has been gladly reproduced by the Opposition press. Like many articles of the kind from which unfavorable to the Governm are drawn, there is not the slightest founda-tion for what it so confidently states. But it is intended to create a certain impression which it is the object of the Onnesition to which it is the object of the Opposition to make. This is why it is so freely quoted. make. This is why it is so freely quoted. The Times was, of course, only too willing to do duty in this matter. It reproduced the article, and it has been varioualy com-mented upon all along the line. To make clear just what is referred to it may be as well to give the article in extenso. Here it is

It b ins to look as if the Nakusp It begins to look as if the Nakus slocan railway will not be completed to orks of Carpenter oreak this year. T racklaying which was discontinued November on account of the fall in the (numbis river, will not be resumed before atter part of May. It is not likely to the Columbia river will be high enough inter part of May. It is not likely that itse Columbia river will be high enough for the transportation of rails until the last of this month, and it will be some time later before there will be enough rails at Nakusp to commence work. From Nakusp to the end of track much repairing is required to get the railroad in shape for the engine. The engine at Nakusp is not suitable for the work and a smaller one will have to be provided before satisfactory work can be done. All these details will retard the construction of the road between Nakusp and Slocan lake, and the company will do well if it completes the road to the head of the lake in July. The grade be-tween the head of Slocan lake and New Denver will require considerable work, as the spring rains have done great amount of damage. The grade has been damaged more, however, between Slocan lake and Three Forks than any part of the road. The washouts and slides along Carpenter oreak will delay construction for several weeks at least.

The washouts and slides along Carpenter oresk will delay construction for several weeks at least. Of course, if the construction company were disposed to put the road in shape as far as Three Forks, at any cost, trains would be running before snow flies, but from all appearances such is not the case. The company has too much real estate at Nakusp and Wilson creek to build the road through to the forks of Carpenter oresk this year. When the construction party will have disposed of the greater part of its in-terests at Nakusp, the end of its line will be haited with Wilson oresk property. As Wilson creek property is not salable now, nor will it be after the road is completed beyond that point, the com-pany will probably endeavor for reach Wilson creek and carry passengers and freight from that point during the present year. After the company has unloaded its Wilson Creek property, which will find rather a slow market under the present oondition of finances, the road will go on to Three Forks, and an effort will be made to

ondition of finances, the road will go on to Three Forks, and an effort will be made to

that townsite. fore the road is turned over to the C.P. Before the road is turned over to the C.P. B., the officials of the construction company will make all they can out of their real estate, and the present washouts and slides on the road will be offered as an excuse for its non-completion, as the lack of rails was announced as the cause last year. Had the company been so disposed, the work could have been finished last year.

It is only necessary to state that the above is simply mischievous and mendacious rabbiah. The road is practically built now, and it only requires the opening of naviga-tion to enable the rails to be brought in to complete tracklaying. The lumber, we are informed, is all ready for the superstructure work of the bridges, and waits only for transportation facilities to be placed on the

ngers were landed would be offering now, which is in a great manifestly unnecessary. But when this is not the case, the city should, without saused by the fear that the United State will not be able to meet its obligations with ubt, have power to supplement or comgold, would be then ten times lete the quarantine processes. With regard to ships from Chins carrying cause what is now feared would then com

polic passengers, the presumption should ways be that they are to a greater or less oblic passengers, always be that they are to a greater or less impossion. degree infected. The smallpox is endemic in the cities from which the coolies come, is a set of the cities from the coolies come, is a set of the cities from the coolies come, is a set of the cities from the coolies come, is a set of the cities from the coolies come, is a set of the cities from the coolies come, is a set of the cities from the citie in the cities from which the coolies come, and though cases of smallpox may not de-velop during the voyage, it is reasonable to conclude that its garms are in their bag-gage. Giving the passengers a bath and fumigating their effects do not take much time, and cannot do any harm. If these precautions were taken before the passen-gers were allowed te land, there would be no room for complaint, and the loss of time caused by the purifying processes would not be worth mentioning. We repeat that as regards coolie immigrants, Chinese ports should always be regarded as infected, and the treated as if there is danger of their car-rying the infection ashore with them.

DISAPPOINTED ENTHUSIASTS.

fter the pas

Coxey and his "army" are in Washing

ton. They are in sight of the Capitlo, and they inhale the same air as is breathed by the President of the United States, its Senators, and the members of its House of Representatives. But Coxey and his merry men do not seem to be in the least benefited by their propinquity to the legislators of the Great Republic. The Commander-in-Chief finds that he is not nearly as great a man in Washington as he was in the country towns of Ohio, and his men are looked at askance by the ubiquitous policeman. They are not regarded as herces, and they

are not regarded as heroes, and they hardly excite as much curiosity as a Wild West show. If Coxey has any sense the journey to the East will do him good. It will takes good deal of the conceit and the self-importance out of him, and will show him how utterly impracticable his objects are. He will find the Government of the United States are not committee word, can be formed. As our readers may remember, Coxey wants the Government of the United States

to create money to the nominal amount of \$500,000,000, and to spend \$50,000,000 of this money immediately in giving work to the unemployed. What appears singular to us is that there are hundreds of thousands of citizens in all parts of the United States who regard Coxey's scheme as perfectly feasible. They consider that the Governfeasible. They consider that the Govern-ment possesses unbounded riches, or un-limited power to create riches, and that it has the power to spend money on any ob-ject it considers necessary and in every part of the Union.

Very few of them, it seems to us, have any idea of what the manufacture of this immense amount of money means. There must be something back of the paper and the must be something back of the paper and the silver which Corey and his associates would have the Government transform into money for which people would be ready to exchange the products of their industry. What is this something? It is the credit of the Government. Before the people will consent to take this immense amount of money they must be convinced that the Govern-

ground. According to contract, of which time is the essence, the road must be completed by the end of the year 1894, but all being well brains will be some time for it. Every one of those Five them something which all acknowledge five them something which all acknowledge to be of value for it. Every one of those notes, whather it be for a big amount or a small amount, must be a promise to pay. If it is not that, no one, not even the most in the prey of the most insorupulous men in the alliance. Count Meroier led Mr. Laurier into the Rielite campaign. He led him and the provincial premiers into the support of the programme of the insortious Quebes conference. The Count furnished federal campaign funds from the proceeds of the transactions which after wards drove the Quebec Premier from public the support of the transactions which after the second give an individual's note of hand, value able according to the known ability of the promiser. Who is to pay these five hundred millions when payment is required? Not the Government of the United States, for the simple reason that the Government is not worth a thousandth part of the sum. If the manufactured money is to be paid at all, it must be paid at all, it must be paid of the United States borrow from them, solves five hundred millions of dollars, for which they pay no interest. The payment must be in gold, and on demand, for if it is the contract. The work was only begun in enthusiastic of the Coxeyites, would give August of last year, and was carried on with extraordinary speed in the hope of completing it before the end of the year. If it were the intention of the company to drag but if there is a promise to pay on it, it is out the building in the way the Prospector like an individual's note of hand, valusuggests, what sense would there be in such able according to the known ability However, we have it on the best these five hundred millions when payment anthority that the road will be carried on to completion with the same expedition that characterised the earlier stages of its con- the Government is not worth a thousandth It is to be regretted that the case of the the Government represent. Chicamen who were detained by the city authorities for the purpose of disinfection, was not thoroughly sifted before Mr. Jus-selves five hundred millions of dollars, for tice Walkem. As the men were liberated which they pay no interest. The payment before the case was argued, discussion ap- must be in gold, and on demand, for if it is peared to be almost unnecessary. It is of not to be redeemed in that way no one before the case was argued, discussion ap-peared to be almost unnecessary. It is of the utmost importance that the city should have power to take all reasonable precau-tions to prevent the spread of contagious disease. If the city health officer has reason disease. If the city health officer has reason to believe that the examination of passen-gers and baggage by the quarantine officer has been insufficiently done, or done in a perfunctory way, he should have the power to take such extra precautions to preserve the health of the city as he may deem necessary.

agen the country. It would have to be ad-mitted that redemption would be an utter impossibility. Wages certainly would go up nominally, to a very high figure in depreci-

RECIPROCITY NOT OBTAINABLE.

EECUPEOCITY NOT OBTAINABLE. Toronto Telegram : Because Sir John Thompson was willing that the Government of Canada should stop looking for reciprocity at Washington before it was kicked down stairs he was demonneed by John Charlton. A vigorus man able in many ways is Mr. Charlton whose strong speeches on the trade question are never Canadian and rarely in-telligent. Mr. Charlton can know little of American politics if he assumes that recip-rocity is now a name to conjure with. The Democrate hats reciprocity and they may obage the tariff but will not make treaties to promote freer trade Trade with the United States is to be stimulated by tariff changes. The government of a self-sactifio-ing country cannot go out of its way to make treaties, but Sir John Thompson and Hon. George E Foster have shown every desires to meet the United States half way. MR. LAURIER'S LEADER

MR. LAURIER'S LEADER. St. John Sun : It is natural if not fit and proper that Mr. Laurier, Mr. Tarte and Count Mercier should be holding a con-ference in Ottawa for the re-arrangement of the opposition programme. Count Mercier has from the time of Mr. Laurier's elevation

" CHRISTY" FRASER'S COLLAPSE.

n the world.

There was a dramatic scene in the On-There was a dramatic scene in the On-tario legislature last week, when Hon. C. F. Fraser, whose speech the previous day against the ballot for separate schools had been interrupted by illness, again had the floor." In strong and vigorous language he was denouncing Comme's bill, when sud-denly his voice grew husky. "Oh! it is useless for me to try," said the Commis-sioner of Public Works, who then sank silently into his chair, leaving the sentence unfinished. He buried his face in his hands and leaned over his desk, coughing slightly unfinished. He buried his face in his hands and leaned over his deak, coughing slightly as if gasping for breach. For some moments there was not a movement in the chamber. The colleagues of the gentleman who had formerly held the close attention of every member of the house looked silently towards the physical collapse of the once powerful debater, and it was with an audible sigh that Sir Oliver rose and informed the oppo-sition that they could proceed with the de-bate. A page rushed to Mr. Fraser's side with a glass of water, which somewhat re-vived him, but undoubtedly the Commis-sioner had finished the last great speech he will ever try to make.

" THE GENERAL'S WAIL."

Toronto Star : General Herbert is prob-ably correct in saying that one great draw-back to the efficiency of the Canadian militia is the preponderance of officers, and he may be right in declaring that a large proportion of the force is incompetent, but he should not forget that the men are vol-unteers, that the inefficient battalions are in small cities and rural districts, where the men cannot afford a great deal of time for military drill. We do not observe that Gen. Herbert has spent any length of time over these country battalions, nor that he has required any members of his staff, or his deputies to do so. The gen-eral has made flying trips to their headquarters, inspected them, grumbled a little perhaps, or looked glum or dissatisfied and gone away. We venture to suggest that one or two days spent with the officers in discussion and in giving them advices. Toronto Star : General Herbert is prob

capitol commission was one shout 12.14 inches in the form of a photograph. The plan in its entirety was absolutely bad, and the architect's work was rendered even worse by the photographer's reproduction. Accompanying this plan was a letter ad-dressed to each one of the commissioners at expitite governor, in which the enterprising architect proposed to yield a rebate of 333 per cent. of his proceeds, which the commissioners at rothitect proposed to yield a rebate of 335 per cent. of his proceeds, which the commissioners at ion might cover back into the state treasury or —do as they pleased with it. This idea was conceived by a California architect re-siding at Freeno. The plan itself will some time prove useful to a farmer desiring to plan for a district school house. CANADA'S MILITARY HIGHWAY.

THE COTTON INTEREST. Montreal Gazette : The amount of capital that has been invested in the cotton mills in Canada is in round numbers about \$13,-000,000. The yearly production of goods manufactured by the mills is somewhere un-der \$9,000,000. The number of hands em-ployed in the different mills is somewhat under 9,000. The yearly wages paid in connection with the manufacture of cotton is about \$2,400,000 per annum. In addition to the above ontlay in wages, there is the CANADA'S MILITARY HIGHWAY. St. Paul Pioneer Press: President W. C. Yan Horne, of the Canadian Pacific railroad, and party, with President Underwood of the Soc road, left Minneapolis last evening in Mr. Van Horne's private oar for Sault Ste. Marie. Mr. Underwood will accompany the party as far as the Soc, and will then return to Minneapolis, the rest of the party going on to Montreal. Mr. Van Horne and party spent the greater portion of yesterday afternoon and last evening in St. Paul. It was given out that the meeting has no direct connection with local affairs, but is simply an inspection tour. From statements made by the Canadian Pacific party it was learned that the experiments recently with military trains were successful, and it is claimed by the officials of the road that these experi-ments have demonstrated that the Canadian Pacific has the finest military train system in the world. is about \$2,400,000 per annum. In addition to the above outlay in wages, there is the ordinary supplies used in large manufactur-ing concerns, also fuel, freights, insurance, etc., which necessarily amounts to a very large sum. The mills number 23 in all-from Brantford in the west to Halifax in the east. Prior to 1878 there ware six mills in operation. Following the institution of the National policy a number of additional mills were started, very largely with a view of employing the local labor, by those seek-ing the development of the respective towns in which they were situated. This deve-lopment in certain cases might be con-sidered, as far as the local interests were concerned, somewhat imprudent, as it sidered, as far as the local interests were concerned, somewhat imprudent, as it tended to create more or lees overproduc-tion, the result being that in most of the smaller mills, where there was also lacking the experience necessary for the conducting of such, to them, new enterprises, a serious loss to the owners was the consequence, this loss being caused by the continued com-petition in the prices of goods manufac-tured. in the world. A NOTICE TO SUBSCRIBERS. Kamicops Inland Sentinel: If those re-mitting postage stamps for the Island Sen-tinel, or in fact for anything else, would take the precaution to rub the gummed side of the stamps on their hair before enclosing them they will not stick together. This is a simple remedy, and if followed would save large amounts of money every year. If the same precaution is taken by those in the habit of carrying stamps in their pockets, they will save themselves much annoyance and oftentimes loss.

PROTECTION FOR HIMSELF ONLY.

PROTECTION FOR HIMSELF ONLY. The protection of the duty of 75 cents per barrel on flour. He, as a miller, desired to see it on the free list. The Comptoiler of Constoms said that Mr. Campbell was trying only to make political and other statements in the house and other statements out of it; and that the member from Kent had asked him to have the duty increased to \$1 a barrel. This Mr. Campbell flatly contradicted. Mr. Wallace repeated his assertion, and other members of the House interfered. Sir Richard Cartwright demanded a retraction on the part of the Comptroller, and when it was refined he appealed to Chairman Bergeron, who said he did not know who was to be called to order and he would not interfere. Then the raful knight ap-pealed to the Speaker, but the Speaker has not yet given a decision. MOWAT A PROTECTIONIEST. Interesting Criticism of the Latter

smoning have the power to take such extra preceations to preserve the health of the dity as he may deem necessary. In the dity as he may deem necessary, is the dity as he may deem necessary. The dity by law, it sphears to us, fives the divid authorities a good deal of power, but if its scope is not wide enough it should be extended as quickly as possible. It is nother to be divide an authorities the data days of the world down and down and the to be a good understanding as regards the minimized of the Dominion. There is no reason why it should do so. There ough to be a good understanding as regards the minimized of the Dominion and those of the officials of the

that one or two days spent with the officers in discussion and in giving them advice, perhaps in drilling the corps himself several times, would be much more effective than in pouring forth voluminous and biting re-ports from Ottaws. The general should re-member that the Canadian forces are volun-teers and that the people in this young country have to work too hard and are too poor to have time to strive to achieve the form of regulars and veterans.

AT HAND WHEN NEEDED.

AT HAND WHEN NEEDED. Montreal Gazette: Take General Her-bert's report as a whole, there is very little praise in it. True, there are faults in the militia system, but about Montreal, as any rate, even the most unsophisticated in mili-tary matters can see from day to day that the service is improving. It is to be re-membered also that, bad as the force be-comes as times, whenever it has been called on for active service—and it has been called on somewhat frequently in the their odd on for active service—and it has been called on somewhat frequently in the thirty odd years of its existence—there has always been plenty of men to fill not only the bat-talions on duty, but those which stayed at ome as well.
