

Listen!

Have you heard about Peps? Peps is a scientific preparation put up in a pastille form, which provides an entirely new and effective treatment for coughs, colds, chest and throat troubles.

Peps contains certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapor, and are breathed down the air passages to the lungs. On their journey, they soothe the inflamed and irritated membranes of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the lungs.

In a word, while no liquid or solid can get to the lungs and air passages, these Peps pastilles get there direct, and at once commence healing.

FREE TRIAL Cut out this across the name and date of this paper, and mail it (with 1c stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps, 50c. box.

A Treat in Overcoats

An Overcoat like this is a happy combination of smart style, sturdy comfort and health protection. Its well-turned lapels, perfect fitting shoulders and graceful lines, make it a garment of unusual attractiveness.

And its construction, with the wind breaks round the corners, the big storm collar and the well-protected against the cold.

Let us show you all the Fit-Reform models in warm Overcoats.

A LATE FALL IS PREDICTED

Wild Animals Slow in Stocking up for the Winter Months.

North Temiskaming, Nov. 20—Unless the Royn gold fields beavers are all sady astray all indications point to a late fall and to a continuance of the mellow autumn days which have been experienced in this district during October.

"Flapperjack", the pride of one trapper in that region, whose custom has been to collect in a dry dam has built across one corner of his owner's cookhouse old bread crusts, choice and succulent bits of kindling wood and other odds and ends of supplies, has yet coaxed away a particle of winter grub, and George Friday, well known Temiskaming guide, declares that all the wild specimens of the national emblem are slow in stocking up against the winter months.

Mr. Friday says he has examined a number of beaver houses and noted the lack of provision.

"Flapperjack", by the way, is not lazy, nor has he lost any of the natural instincts of his tribe, despite his several years of domestic existence. Long before a storm blows up he senses its coming and immediately starts stuffing the cracks of the doors with old bags, loose boots, papers and anything else moveable. His trapper-owner not long ago was unable to enter his cabin just before a storm except through a window, thanks to the activities of his pet.

According to its owner, this very sagacious beaver can make himself very useful. Captured when a baby he has been taught to clear away the land in front of the shack and drag out the trees and gnaw out the stumps, with the result that the trapper has a nice potato patch in cultivation in the heart of the wilds.

One of the best things "Flapperjack" does is to cut cord wood, although it took many months of patient work to teach him to chew the wood to the correct stove length. Recently, having been left alone in the shack, he whittled away the time by gnawing the legs of the table and chairs, leaving the furniture flat upon the floor.

ENGLISH COMMENT ON PREMIER'S SPEECH

Canada's Premier Made Splendid Impression at Canada Club Dinner.

(Canada), London, Oct. 27—Mr. Mackenzie King, with good judgment, selected the banquet given in his honor by the old Canada Club to make a great and important speech. He took this more suitable opportunity of fully and frankly explaining matters of international politics involving a new procedure which has caused some apprehension both in Canada and the Mother Country. It is the first time in our memory of speeches by Canadian statesmen at Canada Club dinners during the last 25 years that a speech of such weighty importance has been made, and the Canadian Premier is certainly to be congratulated both on the selection of his subjects and the fine quality of his address.

It was unfortunate that the most important speech at the Canada Club was made at such a late hour that no adequate report of the Premier's speech appeared in the London Press. In regard to the special Halbut Fisheries Treaty, concluded directly between Ottawa and Washington, Mr. Mackenzie King showed that the matter is one of purely domestic concern to the citizens of the Pacific sea-board of the two countries, and he took particular and explicit care to emphasize his cordial adherence to the policy that no individual action should be taken by any part of the British Empire on matters of vital concern to other parts of the Empire without the full knowledge and consent of all.

His speech was noteworthy also for the broad and scholarly way in which he traced the growth of Canada up from the beginnings of its history as a Crown Colony to its present national status, and he took the example of the different Provinces of the Dominion working out their representative institutions as "emblematic of the League of Nations which makes up the British Empire."

From the racial and other diversities he claimed that the leaders of Canada had "learned how to bring out of these differences a unity which emphasizes the things which we have in common rather than the things which divide," and from this, he claimed, "we have learned how to live and let live and how to forget and forgive."

Mr. Mackenzie King, in his policy and in his speeches, evidences a pride in and love of Canada equal to that evidenced by any of his predecessors, and in this speech he showed the imagination of a politician, rather than that of a statesman, in the value he attached to the historical archives which have been so splendidly augmented by the gifts of Lord Durham and Sir Leicester Harcourt.

The Durham papers he regarded as so important that "a not considerable part of their history would probably have to be re-written from these original records." Mr. Mackenzie King profoundly realizes the powerful influence which knowledge of the past has upon the future, and he is proud of the fact that Canada's early constitutional history can exert in raising the Canadian people to their fullest national stature; he feels that their well-justified belief in the enormous possibilities of Canada's future development will thus be best informed and tempered.

The Canada Club well justifies its existence when it thus provides an occasion for public utterances so authoritative and friendly before an audience that can appreciate their import.

Flatlands

Mr. Herbert Craft of St. John was the guest of Mr. and Mrs. A. Downs for the past week.

Friends are glad to know that Mr. Lloyd Anderson is able to return to work after being home for several days with a cut hand.

Mr. George Ferguson has returned home after spending his Summer months in the west.

Mr. H. C. Craft of St. John and Havelock Downs spent a very pleasant trip up the Upsalquitch river on Saturday.

Mr. Leonard Montgomery was in town on Tuesday on business.

Mr. Robert Murray and Herbert Cooling took a flying trip to town on Tuesday.

BLOTTING PAPER FROM WOOD-PULP

As a result of investigation recently carried out by the Forest Products Laboratories of the Forestry Branch of the Department of the Interior, Canada, in their experimental paper mill, blotting paper with excellent absorptive qualities has been produced entirely from wood-pulp. This is an entire departure in the manufacture of blotting paper, the best grades having hitherto been made from rag-pulp. An interesting feature of the new product is that it contains a large proportion of pulp made from a wood which, although abundant in the pulp industry in Canada,

How to Purify the Blood

"There is thirty drops of blood in the body of a man, and it is the life-giving force of the body. It is the blood that carries the food and oxygen to the cells of the body. If the blood is impure, the body will be weak and sickly. The best way to purify the blood is to take a course of treatment with the Blood Purifier. This will cleanse the blood of all impurities and make it strong and healthy. The Blood Purifier is a powerful medicine that will cure all blood diseases and make the body strong and healthy. It is the best medicine for the blood and should be taken by everyone who wishes to keep their blood pure and healthy. The Blood Purifier is available in all drug stores and is sold for 50c. and \$1.00 bottles.

OXO CUBES

The years use up the tissue of your body. It must be replaced by a food that builds.

Oxo is the concentrated strength of Beef in a form in which it can readily be assimilated by the system.

MAKE GOOD

Edith—"Haven't you and Jack been engaged long enough to be married?"

Too long, he hasn't got a cent left."

"Here," said the salesman, is a pair of pajamas you'll never wear out."

"Ee—yes, they are rather loud for street wear, aren't they?"

PEOPLE MOVE OUT AS LUMBER FALLS

Green Woods Necessary for Farming as Well as Lumbering.

Ottawa, Canada, Nov. 20—The loss of population in numerous districts of Eastern Canada, the desolation of towns and villages forced to surrender their lumber industries, forms the basis of an interesting study by the basic reason for this "evicted population" is the ruin of forests on which the workers depended for their living. One community in Ontario held 5,400 people twenty years ago and the count today is under 1,700. The exodus is accounted for entirely by the destruction of the timber resources of the district and the inability of the land to attract farming population. Planting lumber mills and subsidiary plants have been driven away by lack of timber and were it not for the incoming of a few new industries in later years the present 1,700 population would dwindle to the proportions of a village. New Brunswick furnishes illustrations.

MOTHER OF TWIN BOYS

Tell How Lydia E. Pankham's Vegetable Compound Relieved Her of Indigestion and Great Weakness.

West St. John, N. B.—"I was in general poor condition following the birth of my twin boys, I had a great deal of indigestion, with pain and weakness. Finally my doctor recommended Lydia E. Pankham's Vegetable Compound. He said that this medicine would be the only thing to build me up. I am sure he is right. I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and given them permission to use my letter."

There are many women who find their household duties almost unbearable owing to some weakness or indigestion. The trouble may be due to, for example, such annoying symptoms as dragging pains, weakness and run-down feeling.

Lydia E. Pankham's Vegetable Compound is a scientific medicine for such conditions. It has in many cases relieved these symptoms by removing the cause of them. Mrs. Pankham's experience is but one of many.

You might be interested in reading Mrs. Pankham's Private Test Book upon the "Allments of Women." You can get a copy free by writing the Lydia E. Pankham Medicine Co., Cambridge, Ontario.

SMART CLOTHES FOR DRESSY WEAR, AS SEEN IN RECENT STYLE DISPLAYS

Whether one's wardrobe is limited or ample, one is always on the lookout for things that are smart and smart. Often by looking at a display of garments that answer to this description one may get an idea that helps one to give just the right touch of distinction to a garment that until that time had been the despair of one's heart.

A clever touch of hand embroidery, the shape of a cuff or collar, will give some little thing out of what promised to be hopelessly commonplace.

Here are three garments displayed recently that may give some ideas to those who either want to buy a distinguished garment or to add the right touch to something they already have.

The ever, striking black and white combination is shown at the left and never more out of the ordinary than in the smart black velvet suit shown which is trimmed with white embroidery on sleeve and front of jacket and has a collar and facing of ermine. It is a simple sports model but would hardly go unnoticed when worn in any group of smartly clad women.

On the right is an even more unusual garment. It is an afternoon wrap of black satin brocaded with bright colors. A high, military looking collar, muff cuffs and wide band on the bottom are of seal fur.

Separate fur scarfs are always of interest. Most women feel that whatever else their wardrobes lack they must contain this requisite. The one pictured in the center is a unique arrangement of sables that is guaranteed to please the most fastidious.

PULPWOOD.
