Chas. Whitman has returned to Halifax to resume his studies at the Commercial College.  
At the Board of Trade meeting held on Monday evening, it was decided that public feeling was against the removal of the elevated bridge on St. George St. It is probable that application will be made through the Railway Commission for a more suitable structure than the present one.

**THEY ACTUALLY CURE RHEUMATISM**

**Gin Pills Prove It**  
It is one thing to claim to cure Rheumatism. It is quite another to do it. Gin Pills bear out every claim we make for they are not a "favorite prescription" or a "miraculous discovery" or a "wonderful secret preparation". They are simply a common-sense, scientific combination of medicines that have proved their value in Rheumatism, Kidney and Bladder Troubles, and Disorders of the Liver.  
Ogden, N. S., July 1st, 1909.  
"I have been troubled with Rheumatism so bad that I could not work. A doctor tended me and advised me to go to the hospital but all of good until a friend told me to try Gin Pills. I did so and after using a few boxes, I am perfectly cured. I am recommending Gin Pills."  
D. J. LAWLER.  
There is no reason why Mr. Lawler's case should be any different from yours. He took Gin Pills and cured himself of Rheumatism. Why don't you take them and cure yourself?  
We will let you test them free. A sample of Gin Pills will be sent you, absolutely free, if you write the National Drug & Chem. Co. Limited Dept. N. S., Toronto.

**THE RED FOX'S TRICKS**

THE LITTLE FELLOW SEEMS TO OVERCOME ALL TROUBLES.  
In spite of all the evils that beset him the Red Fox Thrives and Manages to Get Along Almost Anywhere—He is a Fine Mouser-Catcher and is of Great Service to the Farmer.  
Too well known to need description; the joy of the hunter; hated by the farmer; yet one of his best friends; hunted, trapped, and poisoned by experts everywhere, the red fox holds his own in every section of the country. In fact he appears to thrive and increase best under the most difficult conditions.  
Have you ever during the spring months visited a fox den where a mother fox and family reside? If not, out of nature's tricks has been missed. In crossing a piece of woods one fine spring afternoon I happened to be in a place by a most peculiar noise. Moving forward with extreme caution, I approached the hole of a sandy yellow hole and saw a fox standing once more, and down the hill on their path went rolling, tumbling, and growling, a bunch of young foxes. At the bottom they would break away and rush up the hill a distance, then disappear into a hole only to appear higher up or lower down the hill from some underground passage, and repeat the same thing over and over again. A sharp cry close by told me I had been seen by mother fox, and the little fellows retreated to the hole. All was still, but from a couple of holes there could be seen a moment later a small pig and a lamb. The foxes were not to be seen. Examining the den I found a number of holes for fully fifty feet up the hill. The path was made by the young foxes, and no doubt was an ideal playground. At the foot of the hill was a large entrance to the den. At the mouth of this entrance was a perfect litter of refuse, among which were some wings of ducks, turkey geese, chickens, crows, grouse, and other small birds, also feet of small pigs and lambs. At the foot of the hill was a large entrance to the den. At the mouth of this entrance was a perfect litter of refuse, among which were some wings of ducks, turkey geese, chickens, crows, grouse, and other small birds, also feet of small pigs and lambs. The foxes were not to be seen. Examining the den I found a number of holes for fully fifty feet up the hill. The path was made by the young foxes, and no doubt was an ideal playground.
