

## Alden's Manifold Cyclopaedia.

America and Artemis are the beginning and ending of the second volume of Alden's Manifold Cyclopaedia, which, even better than the first, fulfils the promises of the publisher's prospectus. It is a really handsome volume of 640 pages, half Morocco binding, large type, profusely illustrated, and yet sold for the price of 85 cents; cloth binding only 60 cents—postpaid. Large discounts even from these prices are allowed to early subscribers, the price being gradually advanced as the work progresses; particulars sent on request.

The Manifold Cyclopaedia is, in many ways, unlike any other Cyclopaedia. It undertakes to present a survey of the entire circle of knowledge, whether of WORDS or of THINGS, thus combining the characteristics of a Cyclopaedia and a Dictionary, including in its vocabulary every word which has any claim to a place in the English language. Its form of publication is as unique as its plan—the "Ideal Edition" its publisher calls it, and the popular verdict seems to sustain his claim. It certainly is delightfully convenient. It will not be strange if this proves to be the great popular cyclopaedia. It certainly is worthy of examination by all searchers after knowledge. The publisher sends a specimen volume on receipt of price, to be returned if not wanted. JOHN B. ALDEN, Publisher, New York, Chicago, or Atlanta.
