

subject was discussed by Dr. Fletcher and Mr. Jarvis. The work of the Codling-worm and its ravages this year, the Oyster-shell scale, the Woolly Aphis, Flea-beetles and other insects were taken up and discussed by Dr. Fletcher, Dr. Brodie, Professors Hutt and Bethune, Messrs. Jarvis, Nash, Caesar, Crow, Frier and Thompson. The remainder of the afternoon was occupied with the reading of the reports of the Directors on the insects of the year in their respective districts.

In the evening MR. A. H. KIRKLAND, of Boston, who is in charge of the efforts now being made in Massachusetts to suppress the Gypsy and Brown-tail Moths, gave a highly-interesting account of the work and the results that have so far been accomplished. His address was illustrated with a series of lantern pictures, which graphically showed how the operations are carried on. He described also the importation of parasites and some predaceous beetles from Europe, and the amount of success which had so far attended their efforts to breed them. DR. FYLES followed with one of his charming papers, "The Voices of the Night." Much regret was expressed that the attendance was small owing to the attractions of the holiday.

During the second day, Friday, November 1st, meetings were held both morning and afternoon in the Entomological Lecture-room, and were well attended by the members and students. The reports of the Council, Officers and Branches of the Society were presented and read, and the following papers: "The Two-winged Flies of the Province of Quebec," by Dr. Fyles; "Further Notes on *Hepialus thule* at Montreal," by Mr. Lyman, and notes on the same insect by Mr. E. Denny, of Montreal; "Scale Insects of Ontario," illustrated by a large number of specimens, by Mr. Jarvis; "An Unusual Outbreak of *Halisidota* Caterpillars," by Mr. Gibson; "A Remarkable Outbreak of the Variegated Cutworm," by Prof. Bethune and Mr. Caesar; "The Entomological Record for 1907," by Dr. Fletcher. Papers by Dr. Fletcher and Prof. Bethune on the Insects of the Season, 1907, were not presented, owing to want of time. Dr. Fletcher closed the afternoon's proceedings with his Presidential address on "The Entomological Outlook in Canada."

In the evening a public meeting was held in Massey Hall, when an interesting address was given by DR. E. M. WALKER, of Toronto, on Collecting and Rearing Dragon-flies at the Georgian Bay Biological Station. A large number of beautiful lantern views were given in illustration of the lecture.
