

Pituitrin O. and Pituitrin S.

We manufacture two preparations of Pituitrin—one for use in obstetrics, one for use in surgery.

Pituitrin S. (surgical) is *twice the strength* of **Pituitrin O.** (obstetrical).

Pituitrin O. is designed for use in the treatment of uterine inertia when there is no mechanical obstacle to a natural delivery.

Pituitrin S. is adapted especially for the treatment of post-operative intestinal paresis with its attendant pain and tympanites, vesical atony with retention of urine, shock, and inaccessible hemorrhage.

Pituitrin O. is supplied in ampoules of 1 mil (1 Cc.) (No. 16) and $\frac{1}{2}$ mil ($\frac{1}{2}$ Cc.) (No. 47), also in $\frac{1}{2}$ -oz. glass-stoppered bottles.

Pituitrin S. is supplied in ampoules of 1 mil (1 Cc.) only (ampoule No. 110).

Two facts of tremendous significance.

1. Approximately ten per cent. of all deaths in the United States in recent years, it is said upon good authority, have been the result of pneumonic infection.

2. Clinical reports show that more than eighty per cent. of cases of pneumonia recover under treatment with

Pneumonia Phylacogen.

Bio. 605. Rubber-stoppered glass bulbs of 10 mils (10 Cc.); one in a package.

Bio. 602. Rubber-stoppered glass bulbs of 1 mil (1 Cc.); five in a package.

Pneumonia Phylacogen is administered hypodermatically or intravenously.

Literature accompanies each package, or it will be sent to any physician on receipt of request.
