

LIST OF FIGURES

<u>Figure Number</u>		<u>Page Number</u>
2-1	Regions of North America containing lakes sensitive to acidification by acidic deposition based on bedrock geology.	2-3
2-2 a + b	Wind patterns for North America based on surface stream-lines for January and July.	2-10
2-3 a + b	Seasonal precipitation patterns for North America.	2-11
2-4	Precipitation amount-weighted mean annual pH in North America.	2-14
2-5a	Precipitation amount-weighted mean H ⁺ concentration.	2-15
2-5b	Precipitation amount-weighted mean H ⁺ deposition.	2-16
2-6a	Precipitation amount-weighted mean SO ₄ ²⁻ concentration.	2-19
2-6b	Precipitation amount-weighted mean SO ₄ ²⁻ deposition.	2-20
2-7a	Precipitation amount-weighted mean NH ₄ ⁺ concentration.	2-21
2-7b	Precipitation amount-weighted mean NH ₄ ⁺ deposition.	2-22
2-8a	Precipitation amount-weighted mean NO ₃ ⁻ concentration.	2-23
2-8b	Precipitation amount-weighted mean NO ₃ ⁻ deposition.	2-24
2-9	Percent of normal precipitation in North America in 1980.	2-26
3-1	Relationship between pH and the relative proportions of inorganic carbon species.	3-5
3-2	Simplified nitrogen cycle showing chemical changes caused by plant and soil processes.	3-8
3-3	Simplified sulphur cycle showing chemical changes caused by plant and soil processes.	3-10
3-4	Aqueous aluminum in equilibrium with gibbsite.	3-13
