Danny Sovernigo, Secretary-Treasurer

A complete line of pool cover roller systems is offered by Rocky's of B.C. Leisure including permanent and portable models for commercial, inground residential and above ground pools.

The Rocky Permanent model number 4PM is the smallest in the line and will fit under diving boards. This unit simply anchors into the concrete deck or can be attached to a wall where space is limited. Ground clearance is 8½ inches (21.6 cm) and is recommended for use with rectangular pools.

The Rocky Portable number 3 is the line's most popular model for average sized residential pools. It is strong with special 2 inch (5 cm) castors that make it easy to move to and from poolside and is usually installed at the end of an irregular shaped pool. This portable has an 11½ inch (29 cm) ground clearance.

The Rocky II Senior Commercial and Junior Commercial models are designed with heavy gauge aluminum tubing and 4 inch (10 cm) castors. The Junior Commercial has a clearance of 13½ inches (34 cm) and is ideal for large residential and smaller commercial pools. The Senior Commercial has a 16½ inch (42 cm) clearance and an extra long handle for rolling ease. This

The number 3 portable model of Rocky's Eazy-Roller with 2 inch (5 cm) castors is the most popular for residential swimming pools.

unit is excellent for large commercial and public pools. Several blankets can be rolled on top of the one using velcro fasteners.

The above ground model is a specially designed Eazy-Roller with two uprights to handle pool covers up to 4 feet (1.25 m) off the ground.

Rocky's of B.C. Leisure Ltd. ships directly to the United States market.

S. D. M., established 1974, with manufacturing facilities located near Montreal, Quebec, has developed into one of Canada's major processors of plastic. The custom fabrication division, with its extrusion, injection moulding and blow moulding machinery, offers a widely diversified service to its customers including vacuum hose and accessories for the swimming pool industry.

The company's vacuum hose comes in all popular lengths for 1¼ inch and 1½ inch diameters. Models include a swivel cuff, moulded cuff and standard or heavy duty blown cuff. The material is U.V. stabilized with three years of protection. Hoses are poly bagged, boxed or in bulk according to the customer's requirements.
