Obtained in Canada.

UNITED STATES AND FOREIGN PAT-ENTS A SPECIALTY.

Engineering Drawings Furnished.

W. J. GRAHAM, 71 Yonge St. Toronto

M ILL consists of 50 h. p. engine and suitable boiler. One small size Waterous Band Mill with all necessary tools, long carriage, heavy three-saw edger, endless chain, bull wheel rig, 60 inch cut off saw for shingle blocks; two "Dunbar" shingle machines, one combined planer and matcher, and small saws, etc., usually found in mills. The whole in first-class condition, having only been in use a short time and well looked after. Situated at Gaspe Basin, Province of Quebec. Deep water right at mill. Excellent point for shipment to Prince Edward's Island, Cape Breton, and New England ports.

Timber limits consist of 68 square miles on the Dartmouth river, extending one and a half miles back from said river, on either side; always plenty of water for driving. An estimate was given after careful survey on these limits that there are between sixty and seventy millions of spruce and pine and from seventy to eighty millions of spruce and pine and from seventy to eighty millions of cedar. The greater part of these limits have never had an axe on them. As this property must be sold to liquidate an estate it is a rare chance for an investment. For further particulars apply to A. A. Benson, 718 Craig Street, Montreal; Waterous Engine Works Company, Ltd., Brantford, Ont., or Rupert J. Loundes, Assignee, Gaspe, Que.
