

A Natural Philosophy: *Revised Edition.*

Embracing the most Recent Discoveries in the various Branches of Physics, and Exhibiting the Application of Scientific Principles in Every-day Life. Accompanied with full descriptions of Experiments, Practical Exercises, and numerous Illustrations. By G. P. QUACKENBOS, LL. D. 12mo, 450 pages.

This standard text-book has just been carefully revised, and may now be regarded as in all respects an *accurate* exponent of the present state of science. It is distinguished,

1. For its remarkable clearness.
2. For its fulness of illustration.
3. For its original method of dealing with difficulties.
4. For its correction of numerous errors heretofore unfortunately stereotyped in School Philosophies.
5. For its explanation of scientific principles as exhibited in every-day life.
6. For the practical application of these principles in questions presented for the pupil's solution.
7. For a signal perspicuity of arrangement. One thing being presented at a time, and every thing in its proper place, the whole is impressed without difficulty on the mind.
8. For the interest with which it invests the subject. From the outset, the student is fascinated and filled with a desire to fathom the wonders of the material world.
9. For the embodiment of all recent discoveries in the various departments of Philosophy. Instead of relying on the obsolete authorities that have furnished the matter for many of our popular School Philosophies, the author has made it his business to acquaint himself with the present state of science, and thus produced such a work as is demanded by the progressive spirit of the age.

Those who use this work commend it in the strongest terms.

"Whether we regard matter or style, the selection of topics or the mode of developing the subject, clearness of illustration or practical treatment, accuracy, freshness, interest, or general availability in the recitation-room, it stands without an equal."—J. W. BULKLEY, A. M., *City Supt. of Schools, Brooklyn.*

"I find that the author has maintained his excellent reputation as an editor of school-books. The style is clear and precise, yet simple and attractive. The familiarity of the illustrations constitutes a peculiar feature of the book. Altogether, I believe that it has no equal for the great mass of pupils in our common schools and academies."—A. J. RICKOFF, *late Supt. of Schools, Cincinnati.*

"We are using your Natural Philosophy in our School, and we find it *superior to any work we have ever used*. We have a class of forty young ladies, and we find it a pleasure to teach them with the aid of your admirable book."—Prof. J. W. STEWART, *State Female College, Memphis, Tenn.*

"It is just my ideal of a school-book. Mr. Q. has not only left out all the irrelevant matter and false philosophy which abound in most of the popular school-books on this subject, but he has clearly stated in the most systematic and natural manner every important principle, and given the subject a much fuller development than has ever been done before in any work of like grade. The book bears the impress of the profound philosopher and the apt teacher."—J. G. WEBSTER, *Princ. of Academy, Shelbyville, Ind.*
