Weather Strip Every Crack and Cranny DO IT THIS WEEK-END Before the Real Cold Weather Sets In

Do it Because it Will Save Coal by Keeping the Heat in and the Draughts Out

Perhaps you have a door that doesn't fit tightly against the floor. If you have, you'll no doubt be interested in this automatic door weather strip which is illustrated.

As you see it is screwed on the bottom of the door, and has a small attachment or arm, which when the door is closed, presses tight against the jamb and forces the weather strip tightly against the door and floor.

When the door is opened the arm releases the weather strip, thus affording an automatic protection against draughts.

It is simple in operation and effective; furthermore, it's a splendid value at 55c.

Sizes range from 2 ft. 6 in., 2 ft. 8 in., 2 ft. 10 in., up to 3 feet.

When ordering mention size of door and if opens on the right or left. The price is 55c.
