Profiteers are likely to be the big contributors. They want a profiteering tariff, and are willing to spend millions of dollars to get it. They expect to get hundreds of millions back to be taken out of your pockets. These profiteers are more interested in the great cotton combines and similar concerns than in the industries of Aylmer and other places in East Elgin.

SAME OLD TORY TRICK.

The campaign of the Meighen Government hold a special session and every day sees some election the Government should have no fear of the result, but it would appear that speeches that are being volleyed and thundered there at the present time. Premier Meighen has some speeches to his credit in the past that are remembered in East Elgin today, some of them delivered before he became prime minister and some of them since he took office. The leader of the Government has a reputation for shrewdness and wariness, but there have been times when his shrewdness failed to conceal his real opinions, and it is his real opinions and policies that people are concerned with-not the honeyed election campaign. At Stirling, at Kingston, and elsewhere Mr. Meighen, speaking in the presence of his friends, has not hesitated to characterize those who may differ from him politically as "nation-wreckers," "destructive," "given way to prejudices," and in like terms indicated his view that to oppose him is to be a menace to the country.

Sir George Foster had the hardihood to fol-

view that political opponents of whatever stripe must be blackguarded and denounced in the most unmeasured terms. Following so illustrious a lead, the Government orators now in East Elgin have extended the Meighen doctrine indefinitely, and every voter who goes to the polls next week will know where he is classed by Messrs.
