The Truth About SANATOGEN

TNFERIOR imitations of Sanatogen, called by similar names, have recently been advertised in Canada as having "replaced Sanatogen in England."

It is just because imitations are inferior to Sanatogen, and have entirely failed to replace it in England, that an all British syndicate has at last been permitted to purchase all the British assets of the German business, with the result that Sanatogen is now absolutely and permanently British.

This has been the death-blow to imitations of Sanatogen in England; in a few months they have become practically unsaleable, and that is why hasty efforts are being made to foist them on the Canadian market before the facts become known there.

Get the Genuine Original Sanatogen-Now Absolutely British.

Genuine Sanatogen is now manufactured at the same British factory, by the same British chemists and workmen, and by the same special processes and machinery that the German firm employed. It is on these processes—used only by ourselves—that the whole efficacy of Sanatogen depends.

No other product has the same synthetic composition or the same nervestrengthening, health-giving properties—properties which, during the past ten years, have made Sanatogen famous throughout the world, both with doctors and the public.

Insist on having "the real thing"; see that the label is marked "Manufactured at our Works at Penzance, Cornwall." Later on we shall re-name it "Genatosan'-genuine Sanatogen-to distinguish it from the multitude of imitations: but for the present it will still be sold in Canada under its original name-
