and E. H. Scammell, assistant deputy minister and secretary and former secretary of the old military hospitals commission.

Touching upon the problem of demobilization and the finding of employment for returning soldiers, Sir James Lougheed said:

"When we first met in October, 1915, the provinces were good enough to say that they would undertake the work of employment of able-hodied soldiers when returned from overseas. It is not unreasonable that we ask again at this critical time for co-operation in the large task now before us, employment and demobilization of the forces. Intermingled with that question perhaps is the question of employment in regard to the hundreds in Canada who will be displaced and out of employment because of the closing of munition works. That will come under the head of civilian employment. This, of course, has put the labor department in operation, and an elaborate scheme has been formulated by the government with a view to dealing with the entire question of employment with a view to dealing with the entire question of employment of abovernment with a view to dealing with the entire question of employment with a view to dealing with the entire question of employment of abovernment with a view to dealing with the entire question of employment of abovernment with a view to dealing with the entire question of employment of abovernment with a view to dealing with the entire question of employment of abovernment with a view to dealing with the entire question of employment of abovernment of the closing of munition works. Baron Aexkuell reports that German forces had begun to evacuate Narva, then they were attacked and defeated by Russian troops Last Tuesday White Guards, commanded by former Russian officers, wei

attacked by a superior Bolshevist force. The guards gave protection a month ago to 500 Russians who alleged they had deserted from the Bolshevist army because of bad treatment. They brought machine guns with them. While the attack was proceeding last Tuesday the se Russians fired upon the White Guards from the rear, contributing materially to their defeat. The White Guards, half

Esthonian workmen are nearly all Bolshevists, according to Baron Aexkuell, and the middle classes of Esthonia and Lavonia are facing the same reign of terror that the bourgeoisie of Russia have suffered.
