ters and Appended Orders. The following is the address of the Grand Master, Most Puissant W. B.

In this, the twenty-mach year since the commation of our grand council, I greet you and as your grand master extend to all present a hearty welcome within the minth As we join hands around our sacred after we should breathe forth from that mystical circle a united sincere prayer of thanksgiv-ing to the great Creator for his protection and blessings during the year that has past, never torgetting that man swirtly passing through the archway of life to the S. V. of sternity.

never forgetting that man swittly pass ng through the archway of life to the S. V. of eternity.

It is manifest that this creer, so beautiful in its ritual and instruction in its teachings, is in nearly all forage jurisdictions gaining in dayor in the Masonie world. From the printed proceedings of these different grand bodies I gather that the order is increasing and although some little differences have arisen over the formation of independent grand councils in some of the United States, yet all are endeavoring to work in harmony and have the difficulty reconciled.

On the lefth of May, 1856, a grand council, R. and S. M. of the Indian territory, under the grand council of the United States, was duly constituted at Muskoges, Indian territory, and having intimated a desire for an interchange of representation, I have complied with theirs request.

In our own jurisdiction we have made some advance and although I should like to see more activity and zeal among our members, yet I have pleasure in announcing that our prospects for a further increase in the near future are bright.

On the 28th March, 1896, I ordered a patent to be issued to Comp. Roderick Mc-Neil, M. D., of Stanley Bidge, P. E. I., appointing him right pussent inspector general was received by our grand recorder, praying for a clapensation was accordingly granted and the council organized on the 13th May, 1896, as "Kensington Council, No. II." The correspondence and papert will be laid before you and I trust the grand council will with pleasure order the granting to them. a charter.

you and I trust the grand council will with pleasurs order the granting to them a charter.

Having had an intimation and some correspondence from companions at Fredeticton, N. B., that there was a desire to form a council there, on the lith May, 1896, I ordered that a patent be issued to Comp. Moses S. Hall of Fredeticton, appointing ham right pulssant general for the county of York, N. B. Although as yet I have no positive information as to what has been done in this latter matter, yet I have the assurance of the companions interested in the movement that a petition will be forwarded for a dispensation to form a council, there at an early date.

My attention was called to statements in the printed returns of sister grand councils that an interchange of representation had been had with some of them and a "grand council of Canada." Having no knowledge of any such body, on inquiry I ascertained that the grand council of Ontario (an off-shoot of our grand council) had latterly assumed to themselves the name of grand council of Canada. The attention of the grand council of Ontario was brought to this innovation, and I am happy to say that we have the assurance that the error will be rectified.

Our friendity relations, therefore, with for-

Our friendly relations, therefore, with foreign jurisdictions continues and in furtherance thereof I have rad the honor of placing in nomination the names of tilustrious
companions as representatives of the several
grand councils of North Carolina, New Jersey, Massachusetts, Indian Territory, Vermont, and Ontario, near the grand council
of New Brunswick and have had the further
honor of commissioning filustrious comrations as representatives of our grandcouncils near those grand councils respectively.

Comps. Henry Duffell and Edwin J. Wetmare.

The former had long been recognized as a headlight in Freemasonry; honored by citizens, revered by friends. Exemplary as a Mason, beloved by all, his death removes one of our ancient land marks.

Ill. Comp. Wotmore had been connected with our order for many years, and was the representative of the grand council of New Hempehire near our grand council. He was a man of retiring disposition, although prominent in the order; patient, persevering, cautieus, and always ready to extend the right hand of fellowship. It can well be said of him that he stood not in sinners' ways, nor eat where men profunely talk.

Bleased are the dead which die in the Lord, for they rest from their labors and their works follow them.

In conclusion, companions, I return year my sincere thanks for the honor conferred upon me a year ago in electing me as your grand master, and I can assure you that my labors in the future, as I hope they have been in the past, will be for the success of our cryptic rite.

THE EXPORT APPLE TRADE. THE EXPORT APPLE TRADE.

J. C. Smith of Burlington, Ort., who represents the firm of Hart & Tuckwell in the west, was in Monitreal last week, and in discussing the apple question, he was very pronounced in his opinion, both as regards the immense crep in Canada, and the low prices which will be accepted in order to work off a portion of our large surplus. Mr. Smith says that the courties of Kent and Hunon will have at least 1,000,000 barness of apples this year, the quality of both the red and green fruit being very fine, except in a few sections, where the crop is so superabundant that the apples cannot possibly attain their full size. These of course will be unfit for export, and consequently will have to be consumed at home. The error in England, Mr. Smith says, will be very light, and will not count in comthe erop in England, ar. Smith says, who is very aght, and will not count in competition with Canadian fruit, as the himserop will be worked off before the wiver ruit from Canada reaches the other side.

HEIRS WANTED

Of Miss Delia McGrean, who was born in Nova Scotia and was formenly housekeepered the Heal Hamilton at Washington, D. C. Relatives or fr. ends will find it to their advantage to communicate promptly with GBORGE A. SMYTHE, Counsellor-at-law, 110 Ames Building, Boston, Mass.

perial government would think of granting a subady to the proposed fast Afilantic steamship service unless the vessels were available as armed cruisers in the event of war. To suppose that, Mr. Chamberjain would consent to the modification of the conditions already agreed upon, that would render the steamers so many unwieldy freight craft instead of what the country has been asking fer, namely, fast, boats, equal in every respect to the New York iners, is preposterous. There is, therefore, in our mind only the alternative left us of carrying out the arrangements as already made with Mr. Chamberlain for a first class mall and passenger service, or abandoning the project altogether.

BRITISH LUMBER MARKETT

English journals of August 8 report the lumber market active and healthy.

Liverpool—The business of the week, though impeded somewhat by the holidays, has still continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in an active condition, and altilough the amport remains large, the steady and continued in the arrangement for wood goods of nearly every description. Keeps down the stock to a moderate limit for this, time of year. The figures gives for spruce deal require some elucidation. They show a stock on hand of 12,075 standards of the hands of on-sumers, and net available for ordinary marketable purposes. At any rate, in all the various yards at the Canada dock or the storage grounds in that vibritity we see no pile of spruce deals rusing from the grounds such would be supplosed to exist if 12,075 standards were in stock.
